COE'S NEW Seedless PEAR

(Patent applied for)
Brand new variety, something different. Think of it—no seeds, practically coreless—solid all the way through. Ideal canning pear—no waste of time or fruit. Ripens 10 days later than Bartlett, which it resembles. Bears in 3 years. Five-year-old trees have produced 3 bushels of perfect fruit. So far has not shown signs of blight.
Price: 2-yr., well-branched, 7 to 9/16 in. trees, \$1.50 each; 5 or more at \$1.40 each. Price net, not subject to any cash discount.
See page 27 for further description.

QUINTUPLET APPLE TREE

5 KINDS of Apples on One Tree! *Ideal for Home Gardens*

The only apple tree for the small home owner. No yard too small; can be planted in the front yard as well as the back. Will furnish plenty of shade, be highly ornamental, and also will produce a bountiful supply of five different kinds of apples. An outstanding novelty in your community. Fruit early to late—practically covers the entire apple season. Bushels of all kinds of apples in just a few years.

Note actual photograph of right showing varieties.

Price: 2-yr., sturdy trees, 9/16 in., 4 to 5 ft., \$1.50 each; 5 or more at \$1.40 each. No further discount.

A COMPLETE LINE OF NURSERY STOCK DIRECT TO GROWER

WHITTEN-ACKERMAN
Nurseries
1939
Bridgman, Michigan

35 years of experiments and efforts by Prof. N. E. Hansen, S. Dakota State College, originator of the Anoka Apple and many other fine fruits, produced this new quick-bearing bush-Cherry, which is one of the finest. Our stock of the Cherries was secured direct from the originator, Prof. N. E. Hansen.

HANSEN'S

Bush Cherry

This new Bush Cherry combines two useful qualities—both in one plant. You can now have a beautiful ornamental hedge, single specimens or a group planting, which also produces delicious, wholesome fruit. Hansen's New Bush Cherry is beautiful and outstanding during the entire growing season, as to foliage, flowers and form. In the early spring, this dwarf, symmetrical bush is a mass of beautiful snow-white flowers, covering the entire bush.

This shrub grows rapidly and fruits quickly in any soil. Withstands heat, drought or cold. Requires very little room, and often bears more fruit than a Plum tree. Can be planted as closely as 4x6 feet. Grows only 4 to 5 feet high—3- to 4-foot spread.

The foliage, which is beautifully silvery-green, turns to rich red and gold in the fall. This Bush Cherry is beautiful even without flowers.

Fruit as large as any sweet Cherry, but plum-shaped. Good flavor and is delicious to eat from the bush; fine in sauce, superb in jam; splendid for jelly.

PLANT THESE HANSEN IMPROVED BUSH CHERRIES BECAUSE:

1. Easy to grow and perfectly hardy.
2. Good to eat, and make delicious preserves.
3. Bear early, heavily, and annually.
4. Are dwarf-growing and bushy.
5. Excellent for hedges or ornamental shrubs.

PRICE Sturdy, 10 to 18-inch Bushes, 30c each; 3 for 80c; 5 for \$1.25.

CERTIFICATE OF NURSERY INSPECTION

Michigan State Department of Agriculture

Orchard and Nursery Inspection, No. 531.

This is to certify that the Nursery Stock of the Whitten-Ackerman Nurseries, Bridgman, Mich., has been examined and found to be apparently free from dangerous insects and dangerously contagious tree and plant disease. Fee paid \$26.00.

Lansing, Michigan, September 6, 1938. John B. Strange, Commissioner. Bureau of Agricultural Industry, Lawrence O'Neill, Director. E. C. Mandenberg, in charge of Orchard and Nursery Inspection.

Big Gift Planting of Hansen Bush Cherry

Free with Early Cash Orders

To every customer who sends us an order before April 1st, 1939, accompanied by cash in full at regular catalog rates, not bargains or special quotations, and who in addition sends us the names and addresses of four fruit growers, or purchasers of nursery stock, we will send absolutely free the following number of Hansen's Bush Cherry.

- 1 Hansen's Bush Cherry (priced at 30c) free with cash orders between \$1.00 and \$2.00.
 - 3 Hansen's Bush Cherry (priced at 80c) free with cash orders between \$2.00 and \$5.00.
 - 5 Hansen's Bush Cherry (priced at \$1.25) free with cash orders between \$5.00 and \$10.00.
- On orders amounting to \$10.00 or more, we will include free 8 Hansen's Bush Cherry and an additional \$1.00 value. Your choice of any nursery stock listed in this catalog.

We can handle and ship a \$10.00 order with very little extra expense over a smaller order and we pass the saving on to you in this premium value. Let your neighbor help. Two persons may combine orders and divide the premium if shipped to one person.

Be sure to send the four names and addresses with your order. (Use space provided on back of order sheet). The gift positively will not be sent unless customer complies with this condition. This offer open until April 1st, 1939, only. Our supply of Hansen's Bush Cherry is too limited to make this offer effective after April 1st. On all cash orders received after April 1st, when accompanied by four names referred to, we will include the Hansen's Bush Cherry if still available; but if not, we will include additional nursery stock of our own selection as to variety and value.

No special bargain collections are included in this free plant offer. Nor cash orders where a special reduced price has been quoted.

We Grow because we give you Big Values

100,000 Satisfied Customers—In Every State in the Union Plant Our Hardy Stock—the Reasons are Simple

So many customers cannot be wrong—they buy from us year after year, but they know our stock can be depended upon. Here are some of the reasons:

We sell only the best hardy, Northern grown stock at lowest possible prices.

We promise a fair and square deal to everyone—and make good our promise.

We ship stock subject to examination before payment.

WHY Can We Sell Such Fine Stock at Such Low Prices?

BECAUSE—

We sell direct from our catalog only—you have no agents' commission to pay.

We do not spend thousands of dollars on colored pictures in our catalog. We pass that saving on to you.

We purchase no large advertising space—we depend largely upon our friends and customers to advertise our stock.

To those that are receiving our catalog for the first time, you will find that this is a bargain book which is made especially for farmers, home-owners, fruit growers and gardeners; giving them a choice to buy direct from a nursery at wholesale prices.

We wish to make clear that all stock in these bargains is the same high quality stock offered at regular catalog prices. By placing your order with us, you will be sure of receiving plants, trees, etc., that are first class, and up to grade in every respect.

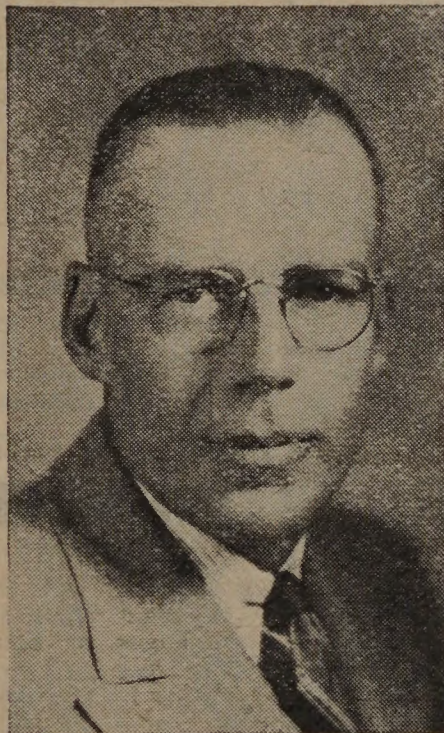

We have been growers for over fifty years, and have farms with the best of soil, tractors, trucks, packing houses, and everything necessary to grow and pack nursery stock, making the handling charge much cheaper; all of these savings are passed on to our customers—we work on a very small margin of profit.

We also wish to sincerely thank all of our old customers for their continued patronage, for we realize the bulk of our new business comes from unsolicited patrons recommended by our satisfied customers. This shows confidence in the Whitten-Ackerman Nurseries, on which we base our hope of future business.

Note new low prices on many of the items offered. Also additional premium. See page 2 for Big Gift Planting.

For your protection, buy direct from our nurseries and be assured of a nice lot of stock and a square deal in every way. We are expert licensed growers and members of The American Association of Nurserymen—the best reference you can have.

We Aim to Tell You the Truth—We Are Farmers, Too, and Don't Try to Sell You Any Varieties We Ourselves Would Not Plant

No Cash Payment Before Shipment

You Examine Stock Before You Pay.

This offer applies only on orders amounting to \$3.00 or more, for shipment on or before April 25th, 1939.

We were the first nursery in this section of the country to adopt this unique selling plan, whereby it is possible for customers to

order without sending any money. Make out your order at full prices listed in catalog, and instruct us to ship C. O. D. Express or Parcel Post, subject to your examination by Express only, as the postal authorities do not permit examination of parcel post shipments.

Look over the shipment and see for yourself whether the stock is in good condition. If shipment is satisfactory, pay your express agent the amount due and the plants are yours—still covered by our guarantee. What could be more fair? We simply must furnish good nursery stock or we couldn't possibly afford to make this offer.

We would advise all small shipments sent by mail, and will send your order by parcel post C. O. D. for purchase price, plus postage, if you prefer. All such shipments are fully covered by our guarantee.

NOTICE: The above offer does not apply on orders amounting to less than \$3.00; on Special Bargain Collections; Special Quoted Prices; nor on any orders specifying shipment later than April 25th, 1939. Cash in full must accompany all orders under \$3.00, or those calling for shipment later than April 25th; but on such orders customers will be entitled to our cash discounts from regular catalog rates, as explained at the right. **WE GUARANTEE SAFE ARRIVAL OF ALL SHIPMENTS MADE ON OR BEFORE MAY 25TH, 1939.**

Order Early and Make a Big Saving

10% DISCOUNT on All Cash Orders received during January, 1939.

5% DISCOUNT on All Cash Orders received during February, 1939.

To those who wish to send all cash with order, we offer these special cash discounts from our regular printed prices (except on bargain offers and special quotations).

Pay Cash and Save Additional Cost on C. O. D. Shipments

Some concerns add 5% to their list price in addition to the required C. O. D. fees if order is for C. O. D. shipment. Knowing our stock will be satisfactory, we will ship C. O. D., if you prefer, at our regular printed price; although, we want to remind you of the collections and money order fees on C. O. D. shipments. These charges, over which we have no control, or do not receive one cent of the fees, amount to approximately 5% on average orders. You can save this 5% by sending cash with order. You take no chances—all shipments are backed by our guarantee.

WHITTEN-ACKERMAN "WAY-AHEAD"

High Quality Fruit Trees

The selection of fruit trees for planting is a matter deserving great care and consideration. Be sure to determine the caliper, grade and height before ordering from any nursery.

TRUTHFUL GRADING *is very important to you*

We offer 3½ to 4 and 4½ to 5½ ft. heights. Some nurseries offer a 4 to 6 ft. grade or "specially selected," using small calipered 4 to 5 ft. trees, which are about the same as our smallest and cheapest trees. Don't be fooled into paying a big price for a small tree.

All of our stock is plainly graded and we furnish trees of larger caliper and greater height than those offered elsewhere at or near our prices.

Quality Is Appreciated

Our reputation for supplying quality stock at economical prices is established, and our policy of a square deal for every purchaser has been proven to the satisfaction of thousands of Whitten-Ackerman customers. Your next order entrusted to us will prove it to you as well.

SUPER-SIZE FRUIT TREES

THE BEST OBTAINABLE. YOU CAN'T BUY BETTER TREES ELSEWHERE AT ANY PRICE. Other nurseries charge anywhere from \$1.00 to \$2.00 each for trees no older, larger or better. Whitten-Ackerman Super-Size Fruit Trees are two years old, the pick of the crop. They caliper no less than 11/16 inch, and many considerably over an inch. They run 5 feet and up in height, depending entirely on the kind and variety, as some kinds are much larger growers than others.

NOTE: 11/16 inch Selected Super-Size Peach Trees are one year old, but are the strongest growers in the nursery row. A two-year-old Peach tree is never sold by any nursery as they make such a growth the second year that it would be impossible to transplant a two-year-old tree. Order this large size tree which has more pep and vitality and be assured of a much more sturdy growth when planted in your garden or orchard.

Plant Super-Size Trees Now and Save at Least a Year or Two

Grading of All Small Fruit Plants is just as important as the grading of trees. All small undersized plants are graded out of the number ones. Note three photographs of small fruit plants in different varieties. We are doing this to show you the root growth and how plants should be graded. Red Raspberry transplants do not always have branches but they must have the caliper. Note photograph showing bunch of Premier strawberry plants, especially the large crowns and root growth; ruler shows actual size reduced to fit this page. All tip end plants are discarded, and this number one stock is fresh dug for your order.

All stock is graded by experts, grown on the best kind of upland soil, grown for plants only, twice State inspected and certified apparently free from disease. Graded stock is much better as you are then assured of the best plants which are full of pep and vigor. Beware of cheap stock grown and dug in a haphazard manner. Buy direct from a reliable nursery — Whitten-Ackerman stock is grown and graded by experts and guaranteed to be as represented in the catalog and to reach you in good growing condition.

PEARS

Best Commercial and Home Orchard Kinds

Bartlett Large; coloring when fully ripe, to waxy yellow with red blush; juicy, melting, highly flavored. Tree bears early and abundantly. Fruit ripens in September at a time when there is little or no competition on the market. Some nurserymen claim there have been more Bartlett planted than all other kinds of Pears combined, and you make no mistake in planting Bartlett yourself.

Koonce Originated in Illinois. One of the earliest pears, free from blight, does not rot at the core like many early pears. Fruit is yellow, medium to large; delightful flavor. Very productive. This variety can be supplied in 9/16 inch grade only.

Campas A new Kieffer-type of the same appearance and season. It seems to make a somewhat better canned product and in other respects is as good as Kieffer. Season very late. Fruit large, and of good quality. This variety can be supplied in 9/16-inch grade only.

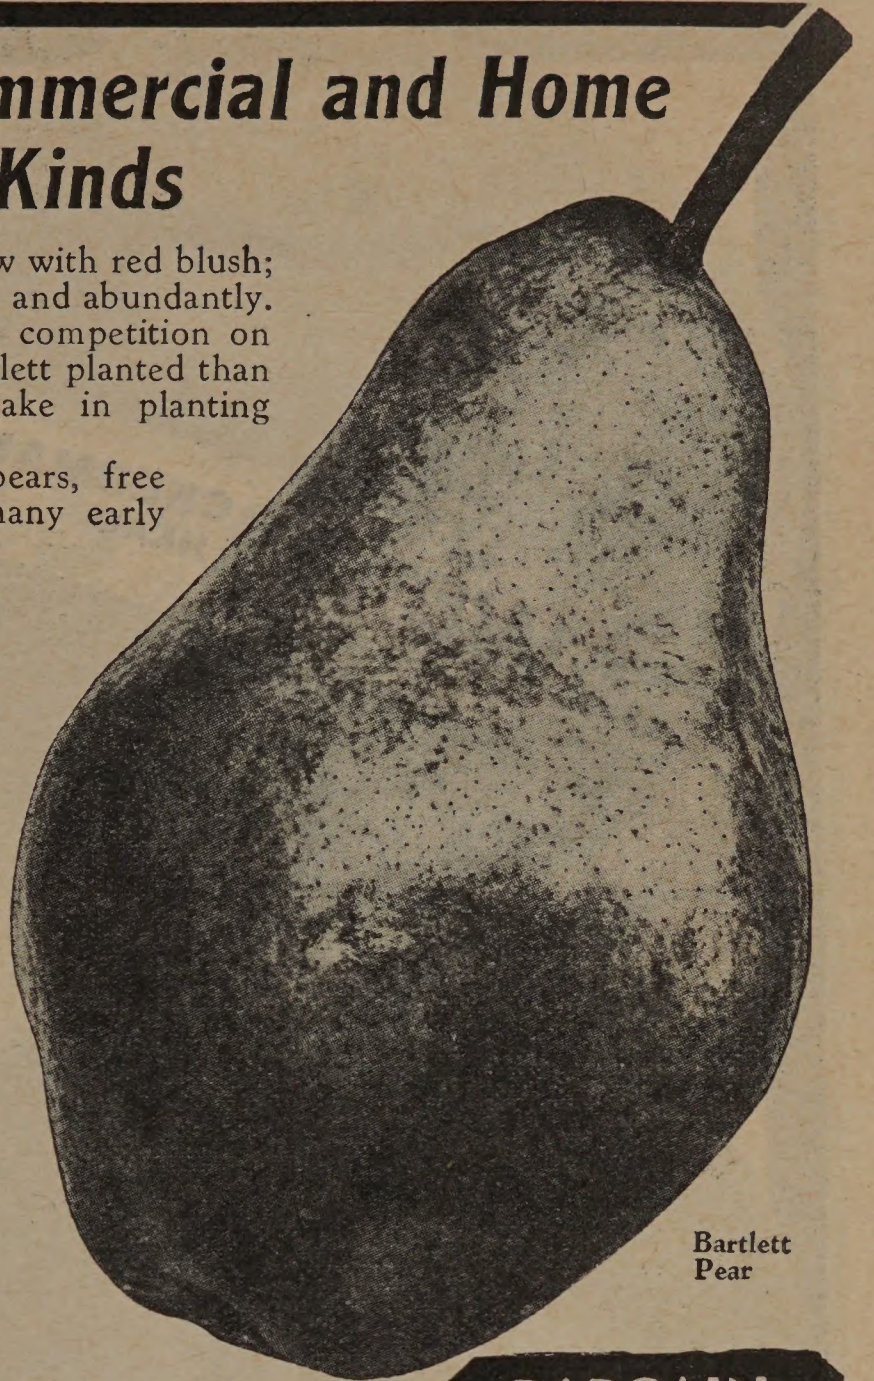

Conference Tree medium in size and very productive. Fruits medium in size. Color yellow overlaid with russet. Flesh melting, juicy, sweet; exceptionally good in quality. Season late; in cold storage will keep until Christmas. This variety was recently imported from England, where it is much esteemed as one of their finest fruits. This variety can be supplied in 9/16-in. grade only.

Seckel (Sugar Pear). Small size; yellowish russet, with red cheek. Flesh white, buttery, very juicy and melting. Ripens in September and October.

PRICES OF PEAR TREES:

QUINCES

Orange Sometimes called Apple Quince. Fruit large, round with a short neck; color bright yellow; flesh tender, juicy and excellent flavor. Highly regarded for jellies and preserves. Trees bear young. A good tree to plant on hillsides or where land is hard to work, as it requires very little care.

PRICES OF QUINCE TREES:

Cortland

WHITTEN ACKERMAN HEAD **HI-QUALITY**

The Best Standard Apples

Cortland An offspring of the McIntosh, but fruit larger, more uniform in size, more highly colored, richer in flavor, firmer but fully as juicy. Clings to tree more tenaciously, and ripens 3 to 4 weeks later. Fine for cooking. A good shipper. Bears 2 or 3 years after planting.

Delicious Winter apple. Has established its claim to first rank, both for commercial and home orchards. Fruit large, flesh fine grained, crisp, juicy and really delicious. Tree hardy, vigorous grower, producing enormous annual yields.

Dbl. Red Delicious The new, superior Delicious that is creating a sensation. Fruit is red all over as early as August when other Delicious are still green. Extra fine flavor. Brings highest prices on the market. Supply is limited, so order early.

Yellow Delicious Best yellow apple. Waxy golden color. Luscious flavor, finest in the world. Bears very early, in 2nd and 3rd year. Keeps until late spring without becoming mealy. Very hardy. You'll make more money with our Yellow Delicious.

Grimes Golden Winter apple. Medium to large size; skin golden yellow; delicious sparkling flavor. Tree very hardy and productive. Bears young.

Jonathan Grand, good winter apple. Bright, solid red. Flesh white, sometimes tinted with red; firm, fine, crisp and tender. A splendid family sort and highly profitable for market. Tree long-lived, productive and an early bearer. Will keep well without especial care; also stands much handling.

McIntosh Red Medium size, nearly covered with dark red. Flesh white, tender, juicy and crisp. Similar to common McIntosh but colors earlier. Tree hardy, vigorous and healthy.

Red Northern Spy Red Spy is a typical Spy except in color. The color is solid bright red without either stripes or splashes. Flesh white, tender, mild, sub-acid. Reliable bearer.

Red Rome Beauty An improved variety, which has a solid, deep red color. Large winter apple of good quality. Thick skinned, stands handling well and a good keeper. Bears young.

Wealthy Ripens late summer, and early autumn. Perfectly hardy, vigorous and productive. Fruit large, red streaked with white. Quality good. A profitable market sort.

Yellow Transparent Ripens in July. One of the best early varieties. Skin clear white, changing to pale yellow when ripe. Flesh white, tender, sub-acid.

Hyslop Crab Apple Fruit medium; yellow grounded with heavy shadings of deep crimson and splashes of maroon with heavy blue bloom. Flesh fine, firm, yellow, astringent. Bears abundantly. Season, September to October. This variety supplied in super-size grade only.

Kendall

Jonathan

The Best Newer Apples

Red Haralson The prize origination of the Minnesota Experiment Station. No finer red winter apple has ever been introduced. The outstanding feature of the Haralson is its keeping quality—keeping in perfect condition until late spring. The Haralson is free from blight and best of all, has the tendency to bear early. Produces a good size, deep red apple of excellent flavor.

Turley (Red Winesap). Extra fine commercial apple. Colors red on the tree much earlier than other Winesaps, filling a long-felt need. Originated in Indiana, and now one of the leading apples there. Large very red fruit. Excellent flavor and quality. Vigorous tree, bears young. Ripens just before Stayman's Winesap. You can't afford to overlook this superior apple.

Kendall A McIntosh seedling, which originated at the N. Y. Experiment Station. Season about the same as McIntosh, but it keeps a little longer, hangs on tree better. Apples are large, trim in outline, flavor more sprightly than McIntosh; handsomely colored over the entire surface with dark red covered with a rich bloom. A good commercial sort.

Anoka See page 27.

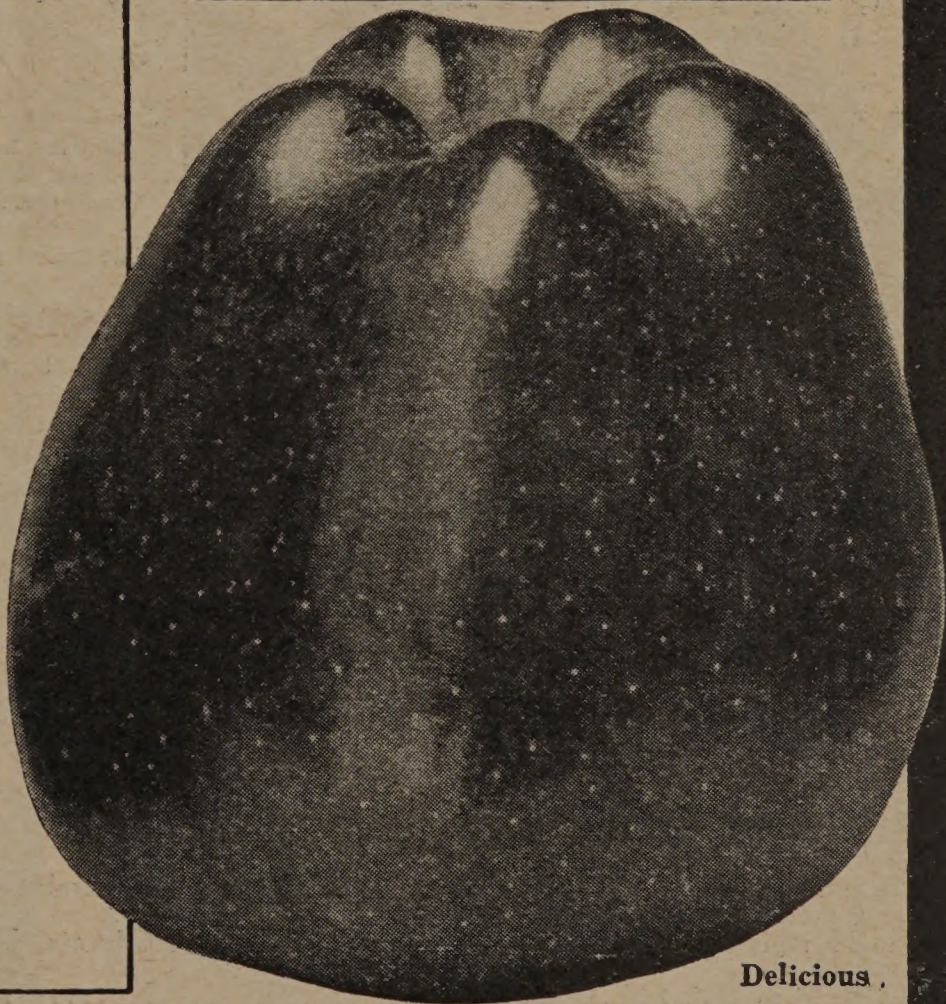

Quintuplet See page 26.

1-Yr., 2 to 3 ft. Apple Whips

We have had so much call for a one-year apple whip, that we are now listing the following twelve choice varieties: Red McIntosh, Double-Red Delicious, Red Northern Spy, Turley Winesap, Jonathan, Red Rome Beauty, Grimes Golden, Yellow Delicious, Rhode Island Greening, Cortland, Baldwin and Yellow Transparent.

Price: 89c for 5; \$1.49 for 10; \$3.45 for 25; or \$6.65 for 50.

Sweet Cherries

Seneca A recent product of New York Fruit Testing Association; shows up the best black early Cherry which keeps well and ships well. Its fruits ripen in the first weeks of June, more than 2 weeks earlier than Black Tartarian. Cherries resemble Tartarian in being round-cordate, purple-black, with juicy, melting flesh, and a rich, sweet flavor. Skin does not crack. The tree is very vigorous, productive, and has an upright-spreading growth.

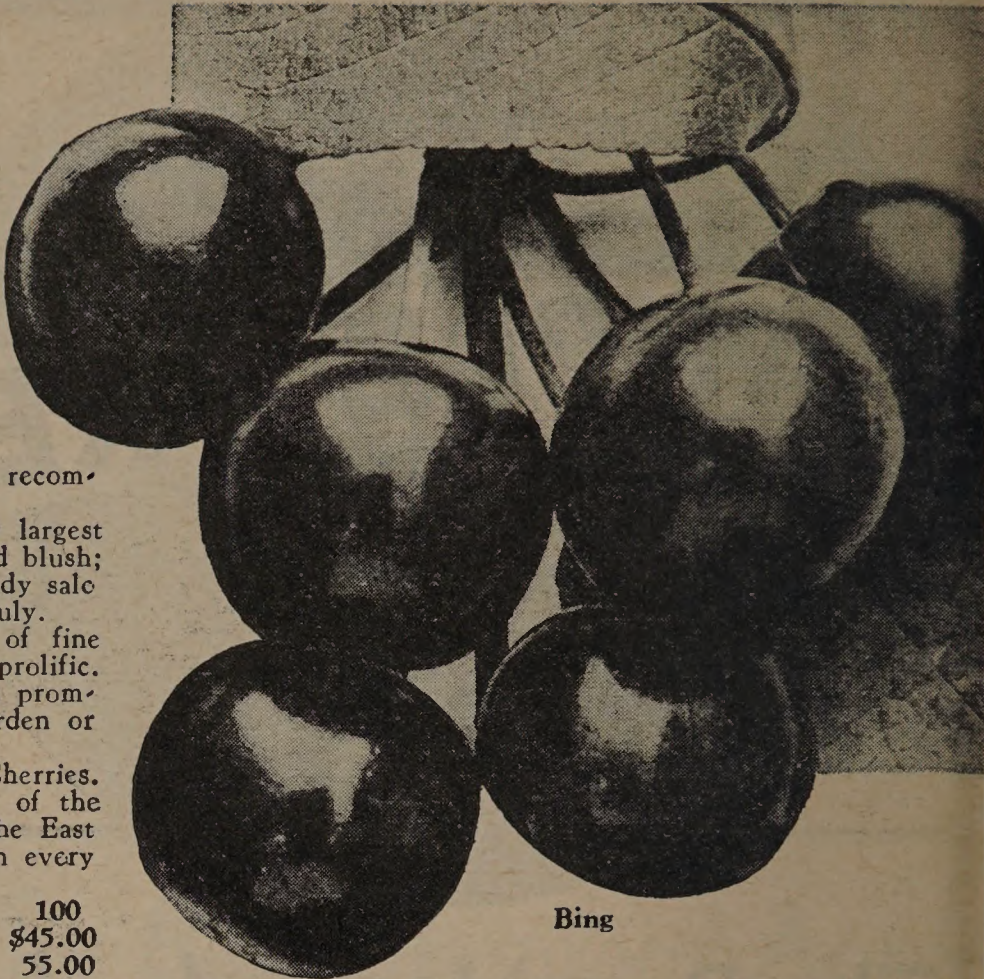

Black Tartarian Very large, purplish black, heart-shaped, flesh mild and sweet, and quality considered, one of the best for market and dessert. Tree is vigorous, upright grower and immense bearer. Ripens in July. We recommend this as one of the best Sweets for home use.

Napoleon (Royal Ann). Of fine appearance and very largest size. Color yellow and amber, with bright red blush; flesh firm, juicy and delicious. Profitable for market, finding a ready sale both for canning and dessert. Bears enormous crops, ripening in July.

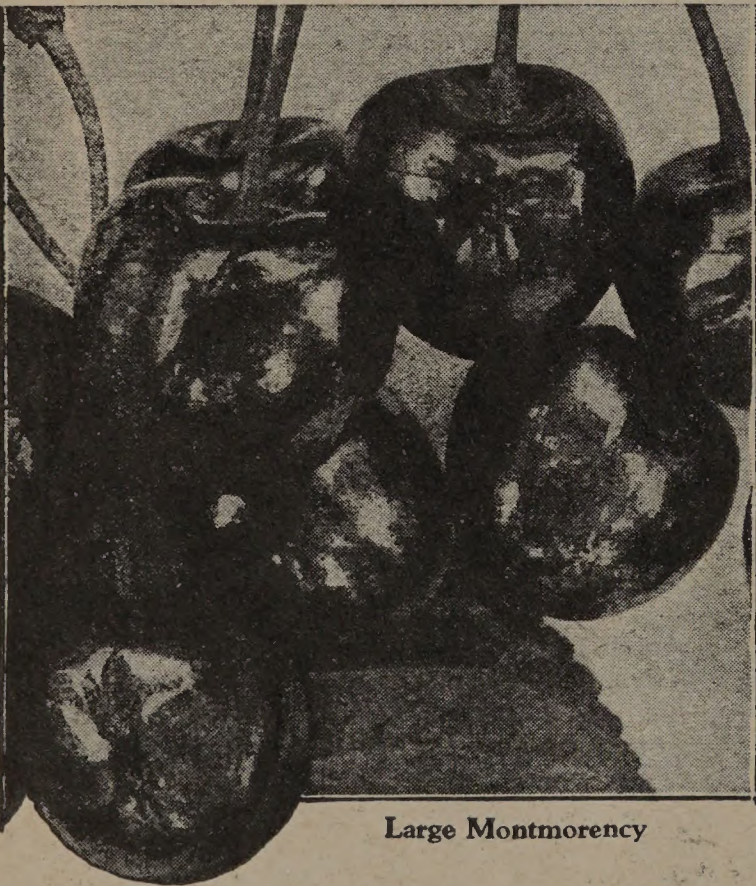

Windsor Fruit large, dull red; flesh remarkably firm, of fine quality, and a good bearer. Tree hardy and prolific. Ripens middle of July. Highly recommended by some of the most prominent fruit growers of the country. A valuable addition to any garden or orchard.

Bing One of the best known and most popular dark sweet Cherries. Fruit large, dark colored, nearly black. Considered one of the most profitable. Tree hardy and vigorous. Seems to succeed in the East better than most Sweets. Ripens late June. Should be included in every planting.

Bing

Large Montmorency

The 2nd WORTHWHILE Sour CHERRIES

We have discontinued propagating all sour Cherries except the two varieties listed as they have proven so far superior to other kinds that we have decided to offer our customers only the best. 90% of all Sour Cherries grown in the United States consist of these two varieties.

Large Montmorency

The leader of all Sour Cherries. Ripens midsummer. One of the finest flavored Sour Cherries. Bears enormous crops regularly. Best all-around Cherry grown. Tree bears two to three years from planting. A real money-maker, as the price of the fruit designated this year.

	Each	10	100

Richmorency (Early Ripening Montmorency) New! Large! Extra Early. Ten days earlier than Montmorency. Largest Sour Cherry grown—red, very juicy, fine flavor.

These facts are of decided advantage, as the size, quality, and earliness of this Cherry bring a much larger profit.

Should replace all other Sour Cherries. Similar to Charlevoix, but better.

	Each	3	10
2-yr., 9/16 to 11/16 in., 3 1/2-4 1/2 ft.	\$0.75	\$2.00	\$6.50

Sweet September CHERRY

NEW FALL-BEARING CHERRY
U. S. Plant Patent No. 94

A new find in sweet Cherries! Ripens September first and hangs until the snow flies. Bears the second or third year after planting! Fruit is dark red, similar to Windsor.

There is no record in the history of horticulture of a fall-bearing Cherry until the accidental discovery of the parent tree which produced 15 bushels in one year. All fruit was sound and perfect, no worms, rot, or leaf spot without ever having been sprayed. Hardier than the average sweet Cherry. For some unknown reason ripens its fruit in September instead of June although the tree blossoms at the same time as other standard varieties.

SEE BACK COVER for further description.

Prune

Profitable

PLUMS

Plums are hardy and grow vigorously in nearly all sections, succeeding on any medium fertile soil. The market for plums is never over stocked, so that good, profitable returns are assured. Plant 16 to 18 feet apart.

Stanley Prune New! Superior to all prunes as it often comes into bearing in 3 years, and ripens 10 days earlier than Italian or German Prune. Hardy, never winter-kills. A more thrifty and rapid grower than all other sorts. Very productive. Fruit large, deep bluish purple; firm and sweet, excellent quality. Will replace all other prunes as soon as stock is available. The best for commercial planting or home use. Get started with this grand new variety this year. Requires less sugar for canning than other kinds.

Reine Claude (Green Gage).

Large, yellow-green, juicy, melting, sugary and delicious. Because of its rich flavor, one of the best for eating and canning. Ripens quite late. Very hardy and productive.

Waneta Our most popular Plum. Generally bears next year after planting. Fruit is very large, reddish purple, good quality. Ripens in August. Planted all over America. Very hardy and rapid grower.

Yellow Egg The best yellow Plum. Fruit is very attractive, large, and rich yellow in color. Wonderful for canning. Bears a large crop, even when the trees are quite young.

Burbank Fruit large and of excellent quality; cherry-red, with lilac bloom. Tree hardy, and heavy yielder. Ripens in August.

Underwood Bears immense crops of large red plums of fine quality. Ripens in August. Very hardy. Fruit firm, juicy flesh, very small pit, freestone.

Abundance Round, amber-colored with red blush. Thrives everywhere, and never fails to produce an enormous crop. Popular market type.

NINE of the BEST

There's a Difference. Northern Grown.

Buds Especially Selected from Heavy Bearing Trees.
Insures a Bumper Crop.

We wish to call special attention to the new varieties listed on this page, which have been tried and tested, and are outstanding either for home use or a commercial proposition. You cannot afford to overlook these new kinds—they are sure money-makers.

FERTILE HALE (La Duke). This new introduction, as the name implies, is a Hale which is self-fertile, thereby doesn't require cross pollination. The Fertile-Hale will produce full crops of beautiful large Peaches, entirely free from all so-called "buttons" so prevalent in crops of J. H. Hale. Season little later than Elberta. Tree vigorous, hardy, productive. Fruit is a little longer than round, very large, attractive in appearance. Flesh yellow, with deep carmine blush. Good quality. Freestone. Splendid market variety. Protected under U. S. Plant Patent. Price: 1-yr., 7/16 in., 85c each; \$7.50 for 10; \$36.00 per 100.

KAL-HAVEN This new variety originated at the South Haven Experiment station, in Michigan. It is a cross between J. H. Hale and Kalamazoo. It ripens just before Elberta, although will overlap the season of the latter variety. Freestone. Yellow with beautiful coloring. Large in size, and an excellent shipper. Fine flavor. Tree vigorous, hardy and productive.

RIO-OSO GEM This variety is protected under U. S. Patent No. 84. Ripens about ten days after J. H. Hale, during that period when there are few Peaches on the market. This new Peach has the extreme large size of J. H. Hale, is more highly colored, of finer grained texture, firmer, and of better general quality. Yellow freestone Peach. The Whitten-Ackerman Nurseries are specially licensed to distribute this fine new yellow freestone Peach; but to eight states only, viz: Ohio, Indiana, Illinois, Missouri, Michigan, Wisconsin, Minnesota and Iowa. Price: 1-yr., 7/16 in., 3-3½ ft. trees, 60c each; 10 for \$5.00; 100 for \$40.00, net, not subject to any cash discount.

VALIANT A Canadian origination. A seedling of Elberta, is very promising. The fruit is large, roundish oblate, yellow blushed with red, with firm, juicy flesh of very good quality; a freestone. The trees are productive. It is in season by the first of September or about two weeks ahead of Elberta. Noteworthy because of earliness and rich delectable flavor.

VEDETTE A comparatively new variety originated by the Vineland, Ont., Canada, Experiment Station. Ripens a few days before Valiant. Like Valiant it was obtained from an Elberta seed. The tree is productive and the fruit is large, roundish oval, yellow fleshed, and a freestone. Good quality. It ripens three weeks before Elberta and is superior to its parent not only in quality but in color as well.

Note the Special Super Size, 11/16 in. Peach trees we are listing this year. See page 4.

See page 26 for New "Hardee Peach."

1939 PRICES — PEACH TREES

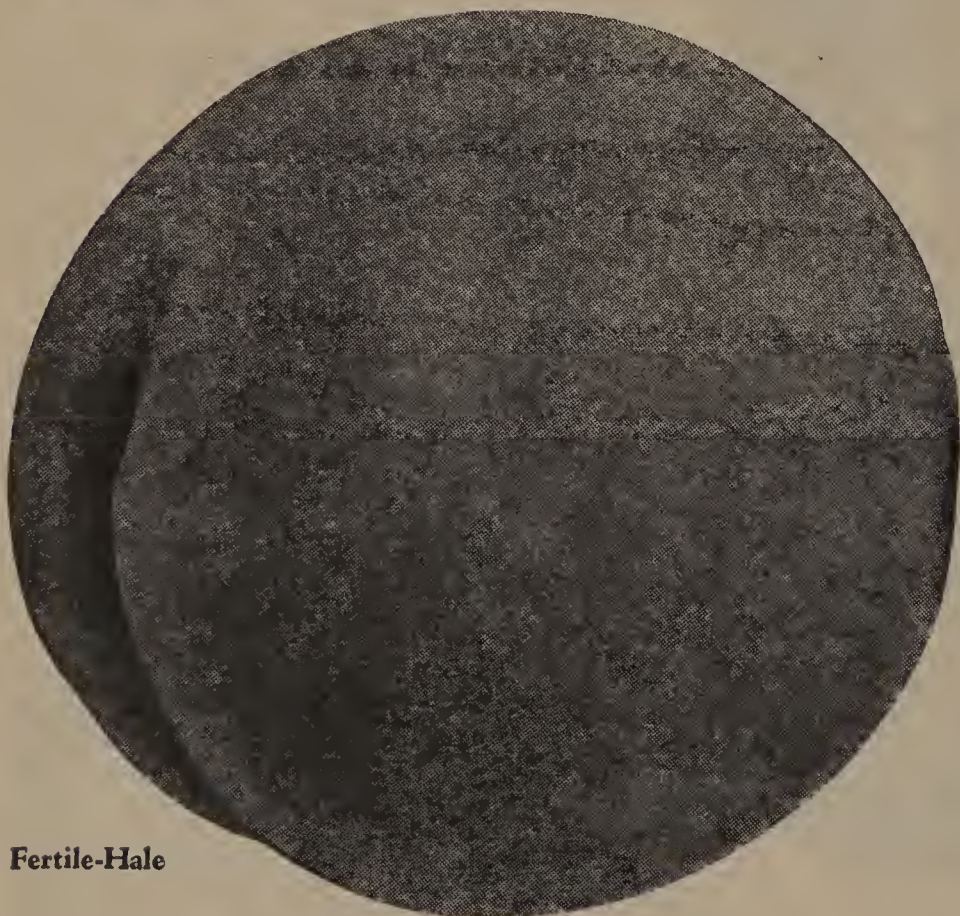

SPECIAL DISCOUNTS from prices below allowed for all cash with orders received during January and February. See page 3. Five or more trees of one grade and variety only at the 10 rate; 25 or more of a single grade and variety at the 100 rate.

WHITTEN ACKERMAN PEACHES

Absolutely true-to-name, vigorous, well grown, perfectly healthy, with well-ripened wood and splendid roots. Guaranteed to reach you in good growing condition.

Standard
COMMERCIAL
VARIETIES

SOUTH HAVEN Extra large, extra fancy, extra early yellow. Combines all the good features of Elberta—large size, excellent quality, delicious flavor, beautiful appearance and immense productiveness, but it ripens 12 to 16 days earlier, enabling one to get it on the market at a time when good Peaches are scarce and when they bring the highest price. It is of the finest quality as an eating Peach and is also a great shipper. Rapid growing, young bearing. You can't go wrong in planting South Haven.

You will not find any spindly whips and poorly branched stock offered for sale in our nursery. We cannot afford to sell them and you cannot afford to plant them.

J. H. HALE This well-known variety needs no description. Ripens 5 days earlier than Elberta, is larger, and superior in flavor; beautiful golden yellow with carmine blush, smooth, fuzzless.

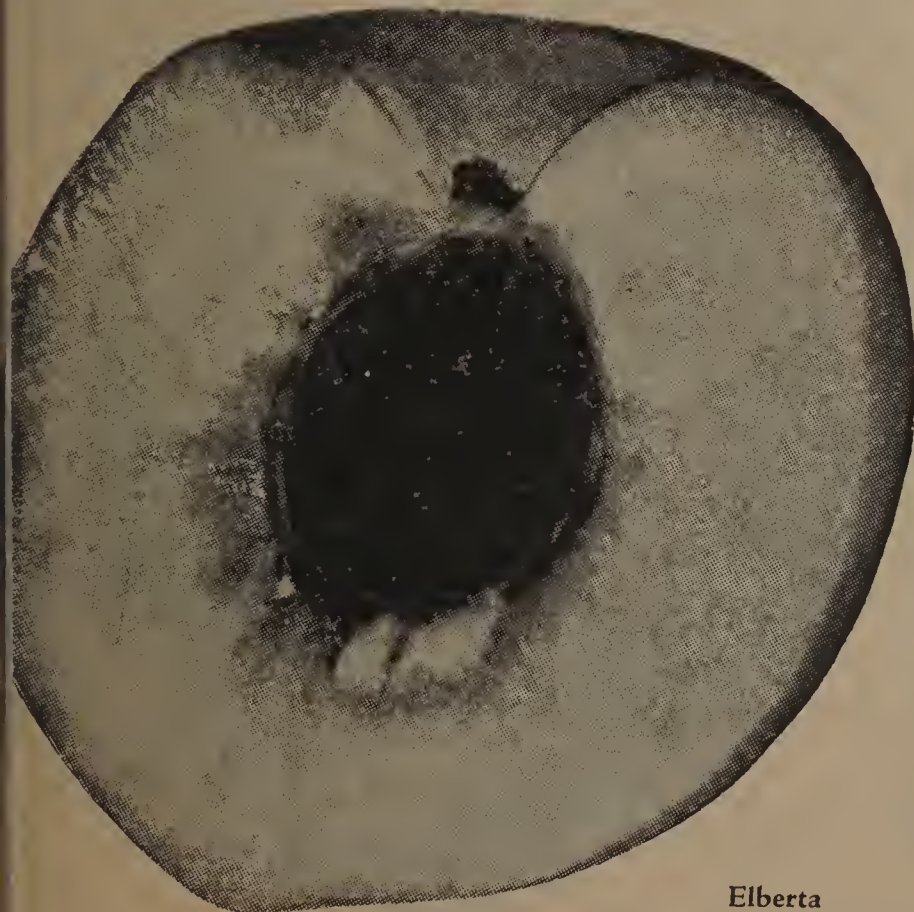

HALE-HAVEN Introduced by the Michigan State Experiment Station. A cross between South Haven and J. H. Hale. Freestone. Strong grower, very hardy, heavy bearer; excellent, fine flavor. Ripens ten days earlier than Elberta. The best New Yellow Freestone we have seen in years.

ELBERTA Standard market Peach of the entire country. Very large; yellow with red blush; flesh is yellow, tender and juicy; very highly flavored, rank, vigorous grower. Does well in all Peach growing sections. Ripens middle of September. Freestone.

GOLDEN JUBILEE Extra Early Yellow Freestone. Introduced by New Jersey Experiment Station. Wouldn't you like to grow a yellow, freestone Peach, with all the good points of Elberta, plus much improved flavor, but ripening a month earlier than Elberta? Here's the Peach you've been looking for! Extra early, fine flavor, self-fertile, grows well wherever Peaches can be raised. Very hardy, regular bearer and a good grower. Has no superior among Early Yellow Freestones.

South Haven

Elberta

NECTARINES

Gold Mine

Hardy as a peach, a delicious sweet flavor, smooth skin. Is a freestone; ripens with Elberta; medium in size; high quality; very attractive yellow flesh.

The Three Best Everbearers

GEM

Big Profits—two crops a year. Plant this spring—pick all summer—you'll get back the price paid for the plants, and **most important, a big profit besides.** You'll harvest another fine crop the following June—two crops in one year. Unlike most everbearers, this variety is an excellent plant maker. The plants are very healthy and vigorous, producing an abundance of runners, which bear fruit the first season.

FREE! 2 Wayzata Clumps

The berries are large, bright red, firm, roundish in shape, rather tart but of good flavor and quality. Good for dessert or culinary uses. Very attractive in appearance and sell well on the fresh fruit markets. Our original stock was secured direct from the originator, Mr. Frank Keplinger.

Gem

Wayzata

WAYZATA

We might call it a real "hill berry" for the reason that it does not produce more than three or four runners to a plant. A decided advantage to the grower, as he does not have to remove first blossoms or runners. Each rooted crown set out this spring starts multiplying new crowns at once, until it has up to 20 or 25 crowns to a plant. It has ripe berries fully a month ahead of other everbearers. Berries are extremely large, very dark red, delicious, sugary flavor. Heavy producer, continuing to bear long after other everbearers have been stopped by frosts.

Wayzata Clumps

As Wayzata makes very few runners, we are now offering a small quantity of two-year clumps for the first time. These are especially grown and are many times the size of the one-year runner plant. They have lots of crowns to the plant, each crown producing fine berries—will bear heavily the first year. These clumps bear fruit so heavily that they must have plenty of moisture. A few plants will supply enough fruit for a small family. A real buy at our low prices. Berries all summer and all fall the first year and a good crop the following year.

MASTODON

Ripe Strawberries 90 days after planting. All summer, all fall, all next year—all from one planting. There is only one true Mastodon—the introducer's original strain. We have it. Grown easily with no special soil or culture. Withstands dry weather. Plants hardy and productive, producing runners freely for an everbearing variety. Berries large to very large, round, conic in shape, dark scarlet in color. Flesh firm, excellent flavor. One of the largest everbearers, of large, uniform size from beginning to end of season. Fruit continuously until freezing weather, bear full crop next spring after planting.

Every Mastodon plant sold by us bears our guarantee of genuineness and satisfaction. Do not be misled into paying fancy prices for this variety, but let us reserve yours now at one of the lowest prices available for true-to-name stock.

Riverton, Wyo., April, 1938.

Dear Sirs:

The 1100 strawberry plants arrived in fine shape; they look fine, and do not believe I will lose a dozen—nice big husky plants. I am very well satisfied with them, and if they do as well as the 600 you sent last year, I will have a lot of strawberries.

Yours truly,
MRS. BILL WOOD.

Mastodon

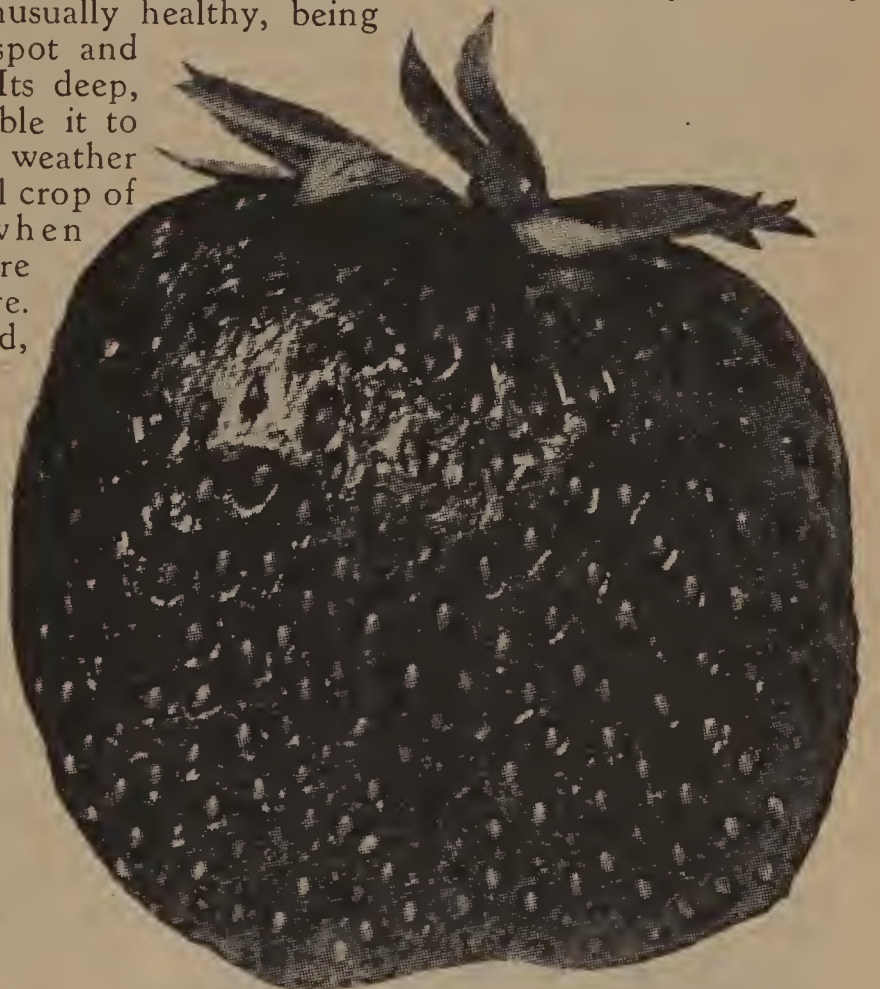

EARLY, MEDIUM and LATE

a fine combination

Premier

Still the leading early berry. A standard of excellence with all growers, and the earliest worth-while

Strawberry of the older varieties. A great money-maker, for it yields its fruit crop at a time when strawberries are in great demand and sell at fancy prices. Premier is as nearly frost-proof as any strawberry can be. It is unusually healthy, being free from leaf spot and other diseases. Its deep, heavy roots enable it to withstand dry weather and mature a full crop of big berries when many varieties are a complete failure. Large, bright red, firm berries, of fine texture and flavor.

Dorsett Early

Developed by the U. S. Department of Agriculture. Berries are very firm, firmer than Premier, and are a beautiful light red in color. They hold this color well, and for this reason, together with their attractive shape and extra fine quality, will undoubtedly become the leading commercial variety. Large, beautiful bright red berries of the finest flavor. Very productive. Vigorous and healthy plant maker. Early as Premier. Very frost resistant.

Fairfax Medium

This variety is also an origination of the U. S. Department of Agriculture. Fairfax ripens several days after Dorsett and Premier, darker red in color. Berries are exceptionally firm. Flavor of the finest, coupled with the vigorous, healthy and productive growing habits, and the large, beautiful berries, undoubtedly makes this one of the leading midseason Strawberries.

Catskill Late

This variety was introduced by the New York Experiment Station. It is a cross between Premier and Marshall, and has been known to outyield the famous Dorsett and Fairfax. Makes a fine, vigorous plant growth; fruit stems are thick and grow upright; leaves are exceptionally large. Late ripening. Good quality berries average the size of Fairfax, and hold their size well to the end of the picking season.

Three New Varieties

The **BEST EARLY**
The **BEST MEDIUM**
The **BEST LATE**

NEET

The best early. Your first cost of plants is the last! The second and third crop as good as the first!

We introduced this variety for the first time last year. This variety was originated by George W. Neet of Dana, Indiana. Is a seedling of the old Haverland and Premier; closely resembles the Premier, but is much hardier, larger, better flavored and invariably

produces more fruit, and has a better fruiting stem. It also produces a fine crop the second and third year, which is just as good as the first crop—a trait not found in any other variety we have grown; you do not have to replace your planting every other year as your patch gets better from year to year, whereas most varieties are not picked more than 1 to 2 years, after which the patch is plowed under.

Berries are extra large, having produced fruit that averages $2\frac{1}{4}$ inches long by $1\frac{3}{4}$ inches in diameter, and it retains its large size throughout the picking season—the last berries being as large as the first. Fruit is dark, glossy red, not quite as dark as Premier, but glossier; red clear through and no white tips. Berries are uniform in shape, no mis-shaped fruit in this variety. They are the most perfect heart-shaped berries we have ever seen. Very sweet flavor, much sweeter than Premier. Ripens early. Not soft but very firm and a good shipper.

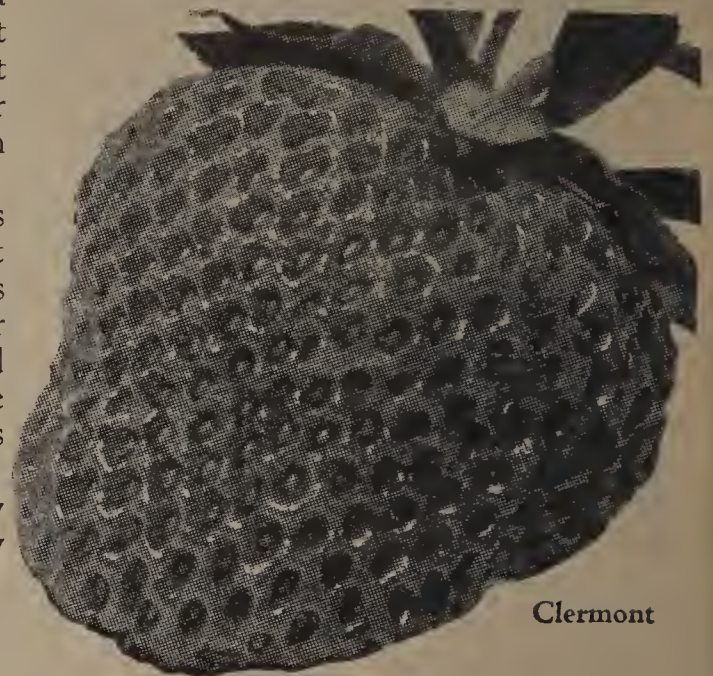

Very hardy. Makes a vigorous plant growth on most any soil. Very disease-resistant; in the seven years of testing this variety, we absolutely

have not found a disease of any kind.

The originator of the Neet Strawberry sent us plants for testing 8 years ago. We have tested it over this period and are thoroughly convinced that it is the most outstanding Strawberry ever introduced.

Neet

Clermont

Clermont

The best medium. This new variety is a seedling from a cross of the Premier and the Marshall. Is a recent introduction by the New York Experiment Station. Has been highly praised in most all northern sections. It bears heavy crops of extra large, smooth, bright red berries of very fine quality. Makes a strong, vigorous fruiting row, and is a very good medium variety. We know a small trial order this year means larger profits for you next year.

LATE GIANT

for the first time last year. A late berry as good as Premier, Dorsett, Fairfax, or all early and midseason leading varieties, and so late that it doesn't begin to blossom until you are picking the other kinds—so late, in fact, that there will be no waiting between strawberries and raspberries. Berries are dark red all the way through, are honey-sweet and have the flavor of a wild strawberry.

This variety has five outstanding points. (1) Is a giant in size; (2) ripens late to real late; (3) will make a good fruiting row on any soil; (4) berry is firm and hard, of extra good quality, and (5) heavy cropper—300 to 500 crates per acre. **ORDER EARLY—OUR SUPPLY OF PLANTS IS LIMITED.**

Late Giant

New Varieties

Grand
Champion

Grand Champion

The 40-day
fruiting berry.
Lasts over

this period on account of its continual blooming. Starts to ripen with the earliest and bears throughout the whole strawberry season; ends up with the latest varieties. Plants are very large with extra heavy foliage, which protects the blooms from freezing in the spring. Never has a crop failure. Berries are large in size, bright red and coreless; excellent flavor and of highest quality.

5,000 quarts on
one-half acre. One
of the heaviest
producers. We
have counted as
high as 90 berries

on one plant. Commercial growers are planting this variety in a big way.

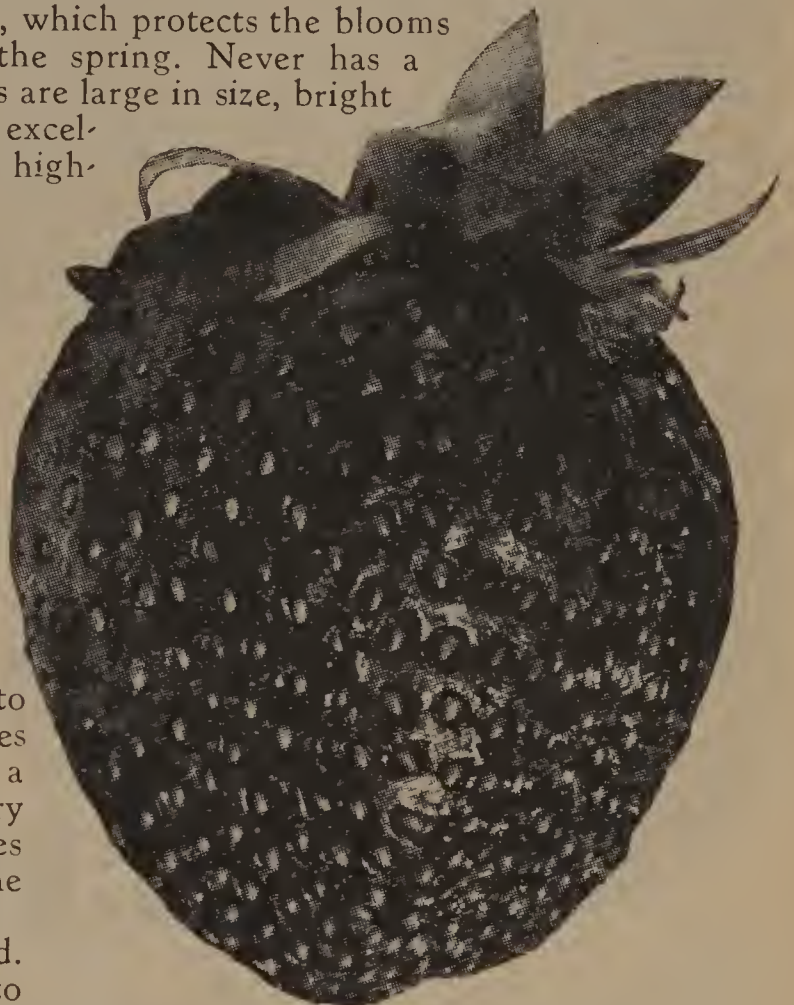

Our planting stock was secured direct from the originator; you are therefore assured of genuine Grand Champion when buying from us.

Ambrosia

This variety is considered to be one of the largest late berries ever introduced. Ripens a month later than Premier. Very

hardy. Produces large, vigorous plants, which often grow 18 inches tall; rigid fruit stems often grow 6 to 8 inches tall, which keeps the berries off the ground, which means clean fruit.

Berries are very large, semi-pointed, rich, sparkling, bright red. Delicious sweet flavor. Firm flesh and skin. Matures every berry to full size.

Ambrosia

Fugeima

A new variety from Japan. Has a record of being the largest berry grown; one grower claims he found 14 berries that filled a quart box, one berry of which measured $7\frac{1}{2}$ inches around, $2\frac{3}{4}$ inches across, and weighed $1\frac{3}{4}$ ozs.

Berries are round, bright red in color and enticingly rich in flavor. Self-pollenizing. Ripens mid-season.

Fugeima

Black Strawberry

Here is a berry which is unique as to coloring and very distinctive as to flavor. Is so deep red, it appears black. Were you to eat one of these berries with your eyes closed, you would think you were eating a black sweet cherry. Ripens midseason, is of very fine quality, an excellent canning variety, and very productive.

SENATOR DUNLAP

This is one of the oldest varieties commonly planted today and never for a single season since its first appearance years ago, has it lost even the smallest part of its well-earned popularity that has made it famous the world over. At the present time there are more Senator Dunlap being planted than ever before, proving conclusively that it is one of the surest, most dependable all-purpose Strawberry

berries. The hardest and toughest variety grown.

In fact, so hardy and adaptable that it produces a fruit crop anywhere, even in locations so unfavorable that many promising varieties fail entirely. Our supply of this variety is limited. Order early and avoid disappointment.

Blakemore

BLAKEMORE

Extra early, ripening same time as Beaver, and 4 or 5 days before Premier. Introduced by U. S. Department of Agriculture. A cross between Premier and Missionary. Strong, vigorous grower and extra good plant maker. Berries are bright red, and resemble Premier, although they are somewhat larger and of better color. Very firm and a good shipper. Excellent canner. Will undoubtedly take the place of Missionary and Klondyke in the South, and will do well in the North anywhere Premier has been grown. Our supply of plants of this variety is of the original strain. We suggest that you place your order for Blakemore early, as there are not half enough plants to supply the demand.

Jumbo

Jumbo

A Real Elephant in Size. Very large, deliciously sweet, fine flavor. Bright red. Firm, ships well. Good plant maker. So drought-resistant it has come through some of the driest seasons without losing a plant. Heavy foliage—not subject to leaf spot. Ripens midseason.

Mary Washington

PEDIGREED ASPARAGUS

RHUBARB

Myatt's Linnaeus

It is an early, tender variety, without being in the least tough or stringy, with a mild, sub-acid flavor. We consider this one of the most profitable market garden crops. We offer good strong roots, at unheard-of low prices.

Victoria

This new variety has giant size stalks, twice the size of ordinary Rhubarb; very tender. Fine flavor. A trifle later than Myatt's Linnaeus.

Bargain No. 19

50 Mary Washington Asparagus
6 Rhubarb

All 1-year

50c Net, Not Prepaid

This new variety was developed and introduced by the United States Department of Agriculture. Has proven to be superior to all other kinds—do not plant any other variety. It is rust-proof, is earlier, the stalks are larger, more tender, more productive; the heads are solid and compact; stalks are often more than an inch in diameter, crisp and delicious; commands a better price than the common sorts. There is no waste with Mary Washington for every tip is healthy and useable.

After a long drawn-out winter, nothing that comes out of the home garden is so much appreciated as the tender stalks and tips of Asparagus. A small bed of them kept weed-free or a border along the garden edge, will supply an average table for six weeks or more in the early spring. The first vegetable to come in the spring; include 100 with your order and have access to an early, fresh vegetable.

HORSERADISH

This popular condiment is very easily produced in the home garden, and anyone who has compared the freshly dug article with that sold over the counters can appreciate the value of the good, home grown products so easily prepared. A half-dozen roots are sufficient for a moderate supply, while a dozen will generously cover the requirements for the average family. As it spreads quite rapidly, the source of supply is easily maintained.

Net, Not Prepaid

Grown for plants only on ideal soil, and given the best of care and plenty of fertilizer, making them vigorous and full of pep. Awarded a clean bill of health by the Michigan State Inspectors. Packed to reach you in first class condition.

Michigan has the most rigid plant inspection of any state in the Union. Buy from us and be assured of disease-free stock.

CUMBERLAND

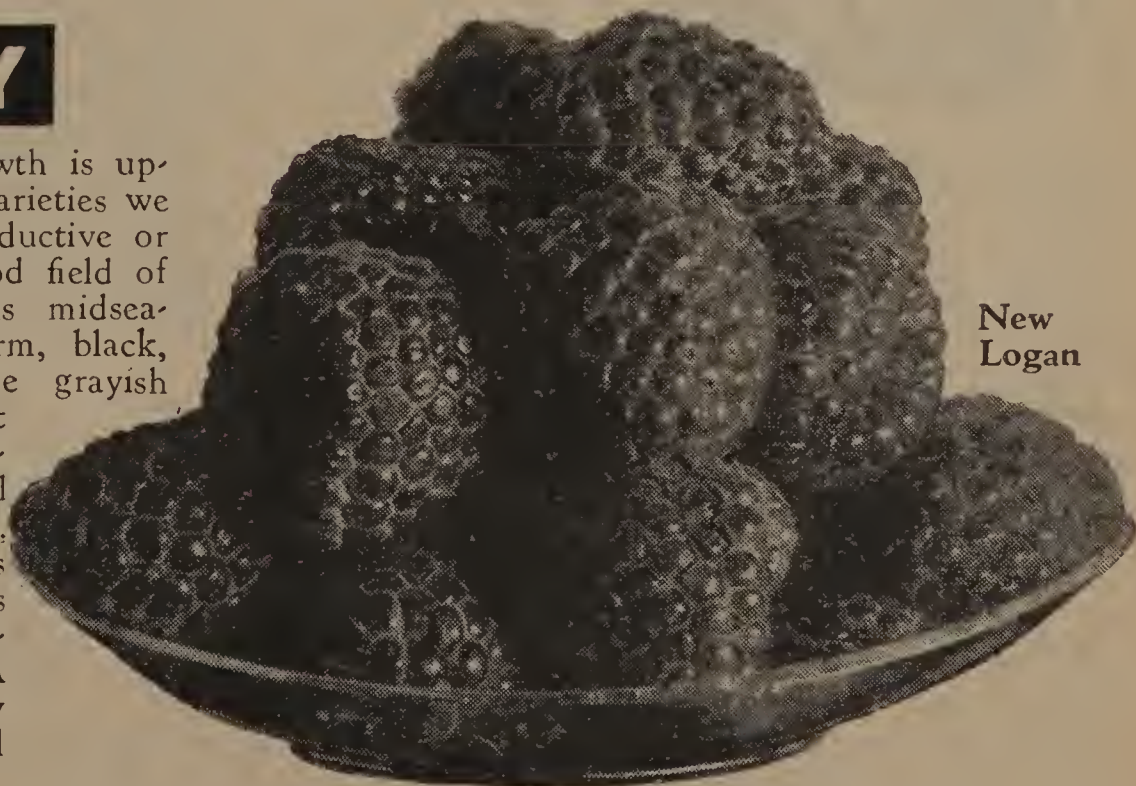

The Largest of all Blackcaps and the Very Best Midseason Kind. We advise planting Cumberland as a main crop variety. No Blackcap has ever been grown as extensively as Cumberland, nor attained its great popularity in all Raspberry producing sections of the country. A heavy yielder, berries large, rich black in color, fruit firm and of delicious flavor. Bush is absolutely hardy, vigorous growing, producing plenty of fruiting wood; especially free from anthracnose, the common disease of all Raspberries. The greatest money-making Blackcap of all time.

QUILLEN

The Latest Blackcap. Comes into bearing after all other varieties are practically through. Fruit very large and of fully as good quality and texture as Cumberland. Practically immune to mosaic, anthracnose and other serious diseases. This variety shows great merit in all sections of the country, and we urge you to give it a trial.

PLUM FARMER

One of the best early Blackcaps. Fine grower, free from disease, very productive. The berry is large, and of excellent quality. Plum Farmer ripens very early, producing the most delicious fruit in one week. Practically the entire crop can be harvested in three large pickings, enabling the grower to reach an early market, and harvest the crop with a minimum amount of labor.

New Logan

3 New Varieties Raspberries

DEVELOPED BY U. S. DEPARTMENT OF AGRICULTURE

INDIAN SUMMER

Everbearing Red Raspberry

A new two-crop red raspberry developed by the New York Experiment Station. Bears in the summer as other raspberries and also in the fall, beginning in September and continuing till frost. The berries are large, somewhat conical and slightly irregular in shape. Of medium red in color and of high quality. They are decidedly superior to any of the other fall-bearers or so-called everbearing red raspberries, that have been offered to the trade up to this time. The plants are hardy and vigorous. Bound to be profitable because of the strong demands for berries in the fall. Certainly worth a good trial planting.

Indian Summer

MARCY - New Red Raspberry

Marcy was the largest of all red Raspberries grown at the New York Experiment Station, and the size holds up well throughout a long season. The shape is long, conic, and flesh moderately firm and thick, with only a small cavity, making the variety a good shipper. Color is medium red. Flavor mild. Plants are tall, sturdy, vigorous, and hardy, with stalky canes that hold the fruit well off the ground. Actual tests show that Marcy is the biggest of all the leading varieties.

TAYLOR New Red Raspberry

Note actual photograph to the right, on opposite page. This variety is the most promising red Raspberry on the station grounds at the present time. The plants are vigorous, hardy, productive, tall growing, and increase rapidly. The sturdy canes hold the berries well off the ground. The berries ripen shortly before Latham, are large, long conic, bright attractive red, thick-fleshed, firm, sub-acid, and of excellent quality. Promises to be our best late red Raspberry.

LATHAM

First Choice of Commercial Growers

A popular favorite in all large fruit growing sections. Extra large, rich red berries, some measuring an inch in diameter. Bears a tremendous crop of best quality fruit. Finest berry for canning. Brings highest prices on any market. Has proven a profitable berry in all sections. Perfectly hardy. Originated in Minnesota at the State Fruit Breeding Farm. We have no hesitation in giving Latham our unqualified recommendation as the best all around Red Raspberry.

Latham plants are State Inspected, disease-free, of finest quality, heavy and well rooted. **BUY THE BEST AND INSURE SUCCESS.**

CHIEF Best Extra Early

A very popular early variety. Offspring of the famous Latham. Has proven hardy, disease resistant, a heavy cropper, of excellent quality and a good shipper. Berries large, rich bright red. Ripens ten days earlier than Latham, bridging the gap between strawberries and ordinary Raspberries.

Taylor

Latham

Newburgh

The New Favorite

A new variety which promises to become a leader. Introduced by the New York Fruit Testing Association, who declare that it is the best Red Raspberry in New York. Has been thoroughly tested throughout the country and produces wonderful results everywhere. Plants are tall, well branched, and vigorous, healthy and very resistant to mosaic and other diseases. Berries are unusually large, bright red, extra fancy flavor. Extra heavy bearer. Do not crumble, and hold their large size over a long fruiting period. Ripens a few days earlier than Latham.

PLANT NEWBURGH NOW! A small investment for large profit.

St. REGIS

Everbearing Red Raspberry

Comes on the market so early it brings the very highest prices. Ripens even earlier than Chief. Produces a full crop during regular Raspberry season, and continues to fruit heavily throughout the summer and fall. Brings in a double profit, and is a real money-maker in spring or fall. Berries have a delicious flavor. Excellent shipper. Give St. Regis a trial this year, and you'll plant more the next.

Blackberries

Increase your profits. One acre of Blackberries will average 2000 to 2300 quarts per acre, and prices on this fruit are always high. The best money-making berry for the past three years.

ALFRED Blackberries

The Blackberry without a Core. Alfred ripens early, about a week in advance of other kinds. Berries are of immense size, some measuring 3 inches around and 2 inches in length. Color is jet black; flavor sweet and delicious. Very hardy, and can be grown anywhere without winter protection.

LUCRETIA Dewberries

The first to ripen. Ten days earlier than blackberries. A real money-maker. Brings a big price on any market and makes real profit for the grower. For quick money, plant two-year stock.

Of the blackberry type, but produced on a trailing vine instead of an upright bush. Very hardy and disease-resistant. Berries are extra large, lustrous black, sweet and juicy. UNEXCELLED FOR CANNING.

ELDORADO

The Best Commercial Blackberry

Eldorado bears young, providing nearly a full crop of fruit the year after planting. Very hardy, never winter-kills. Vigorous grower, large berries, fine flavor, and excellent quality. Very productive; fruits over a long season and insures a big profit to the grower. Highly recommended for commercial planting.

"Acme" Thornless YOUNGBERRY

(Protected by U. S. Plant Patent No. 4)

This wonderful new variety retains all the delicious flavor of the common Youngberry, but is thornless. This variety attains a size of 1½ by 1¼ inches. Ripens earlier than Dewberries. Fruit is very highly flavored, sweet and delicious, dark wine in color, with few seeds. An excellent canner and valuable for table use, jellies and pies. Vines are thrifty growers, very productive, and immune from disease.

A Real Money Maker—Big Yields—Large, Sweet, Juicy

New BOYSENBERRY

The New Boysenberry is truly a glorified Youngberry. We offer it again this year because we think that it has the highest qualities of all bramble fruits, because of the tremendous large size of the berries, because of its very prolific fruiting and lastly because we think that every garden should have a few plants of this immense berry.

They are just as easy to grow as blackberries. They produce a large crop, not because there are more berries, but because each berry is so much larger—berries often are two inches in length. Has a rich, tangy flavor all its own. The few seeds are scarcely noticeable. Plant 6 feet apart in rows 6 feet across. You will be surprised at the berries you can get from a dozen plants. We know after giving this variety a trial, you will agree with us that they are the finest berries you have ever tasted, either fresh, canned, in jams, jellies or pies.

Currants-Gooseberries

Currants are among the easiest of all fruits to grow, bearing good crops even when neglected.

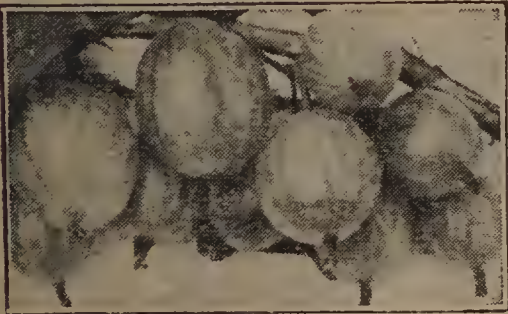

Wilder Bunch and berries very large; moderate acidity. An immense yielder, always dependable.

Perfection Generally considered the best currant. Large, bright red berries with rich, mild flavor, with plenty of pulp and few seeds. Good bearer.

Cherry Thin skin, sub-acid, very large. Is prolific and a good variety for home use or market.

GOOSEBERRIES

Downing Large, handsome fruit, green in color; fine flavor; immense cropper and always in demand. An American variety, free from mildew.

Downing Gooseberry

Red Jacket

A new red berry, larger than Downing. Smooth, very prolific and hardy. Quality and foliage of the best. Absolutely free from mildew. An English variety, and one of the best.

Purple Cap Raspberries

Marion New! Introduced in 1937 as a very large, late, purple raspberry to follow Sodus. Berries are very large, moderately juicy, firm, tart, and good in quality. Ripens about a week before Sodus. Plants are vigorous, bear heavy crops, are hardy, and resemble the red raspberry. Do not crumble.

Marion

Royal Purple

Berries are of purple color, large in size, firm and of excellent flavor; do not crumble when picked. In quality, Royal Purple is more nearly like the red raspberry than any other purplecap. The plants are model growers, vigorous and healthy. A wonderful berry for home use.

Sodus

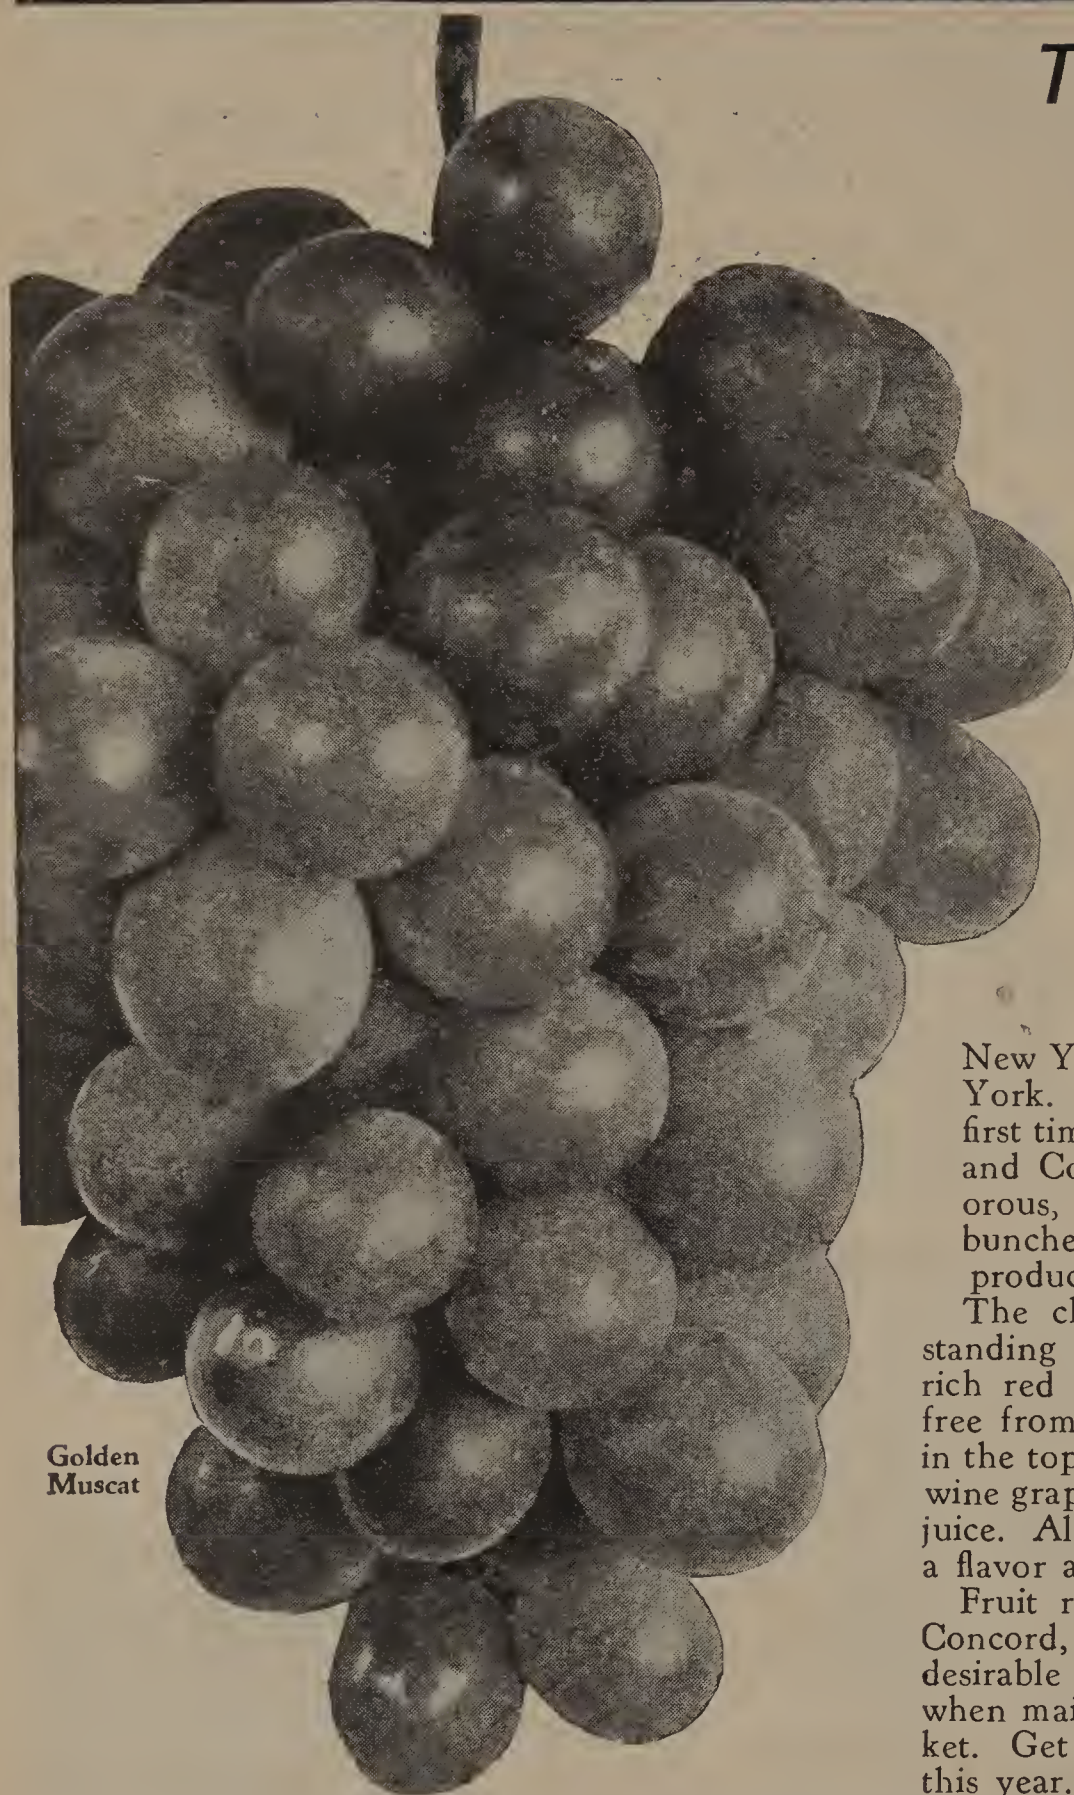

Sodus New Purple Raspberry. More promising than any other purple kind. Large, firm, red-purple berries. Do not crumble in shipping. Has a unique, very pleasing flavor. Plants vigorous, hardy and very productive, with no signs of being subject to disease. You will like it. Try it.

Selected Varieties

THE BEST OF MANY

GRAPE

Golden Muscat

The Best Newer Varieties

FREDONIA Is the earliest good black grape. The vine is vigorous, hardy and productive, and ripens its fruit 2 weeks earlier than Worden. Clusters are medium in size, cylindrical, and compact; berries are large, round, and persistent; skin is thick and tough; flesh is juicy, solid but tender; very good. Fredonia stands alone as an early black grape.

GOLDEN MUSCAT

Possesses a rich golden color and the fine muscat aroma of the European Muscat. For home use and the roadside market it is one of the best. The vine is vigorous, productive; the clusters are very large, tapering, single-shouldered, and compact; the berries are large, oval, juicy, tender, sweet, vinous and aromatic. Requires season about 10 days longer than that of Concord. We know a trial of this variety will convince you that it is unique in shape, flavor and aroma.

WESTFIELD Was originated and introduced by the New York Agricultural Experiment Station, Geneva, New York. Offered to the public in small quantities for the first time this year. The parents of this variety are Herbert and Concord. Resembles Concord in color, just as vigorous, but clusters are more compact; will produce four bunches to the shoot, making this variety much more productive than other sorts.

The characteristics that are outstanding are its high sugar content, rich red color of its juice, entirely free from foxiness. Therefore, it is in the top class as the American red-wine grape or for unfermented grape juice. Also a fine table grape. Has a flavor and texture all of its own.

Fruit ripens a week earlier than Concord, which in itself is a most desirable asset, coming into bearing when main varieties are off the market. Get started with a few plants this year.

VINES

CHOSEN FOR

Flavor Size and Yield

Agawam Red. Very large, with thick skin; sweet and sprightly.

Brighton Dark red. Bunch large; excellent flavor and quality. Vine vigorous and hardy; very productive.

Caco New red grape originating in Delaware. Its quality is excellent. Ripens in September. Fruit is very large, rich wine-red in color; flavor of the finest, very rich and sweet. Vines are strong, perfectly hardy, vigorous growers, healthy and prolific.

Catawba The best red grape of them all. Berries large, dark copper, rich musky flavor; late. Best wine and table grape.

Concord Most popular large, purplish black grape. Large shouldered, compact bunch. Flesh is juicy, sweet and tender, excellent flavor. Vine a strong grower, very healthy, hardy and productive. Ripens in October.

Delaware Berries are compactly set, light red, sugary and delicious. Is one of the very best red varieties, bring highest prices on any market.

Moore's Early An early black variety, similar to Concord in looks and quality, but ripening about one week earlier. A peculiar sweet flavor of its own. Vines are hardy and good bearers.

Niagara The standard white grape. Ripens with Concord. Bunch and berries large. Good quality. Very hardy and productive.

Salem A strong, vigorous vine; berries large, dark copper color; thin skin, free from hard pulp; sweet, and of pleasing taste. Ripens first of September.

A VINEYARD is a LIFETIME Investment

GOOD Plants
Have Strong Healthy Roots
Grown from Heavy Selected Cuttings

Every Whitten-Ackerman Grape Vine is guaranteed to be true-to-name, free from disease, and propagated from productive strains. The cuttings from our plants are all taken from heavy producing vines, each vine being selected for productiveness and size of fruit.

When buying from us you are absolutely assured of getting the best, vines that will produce heavy, uniform yields year after year, a result that cannot be secured from cuttings made in a haphazard way, regardless of quality, a practice all too common in recent years.

Our Grape Vines cost no more than others. You don't pay for the added quality. You can't af-

ford to experiment with vines of unknown origin. We can't afford to sell them.

We don't know of a single farm crop that can be relied on with the same assurance as the grape harvest. Many a grower has been able to keep the wheels turning through a lean year, only because of his grape crop. It's a good insurance for anyone.

3 Outstanding New Fruits

QUINTUPLET Apple

After experimenting for several years trying to produce an apple for the small home owner whose yard will only permit the planting of three or four trees, we have finally perfected the Quintuplet Apple, which provides five varieties on one tree. Although, if you have a large yard or an extra lot, these trees can be grown on a larger scale, producing an abundance of fruit which can be sold to your neighbors or the grocery store on the corner, netting you a nice income.

The varieties are Yellow Delicious, Double Red Delicious, Yellow Transparent, Rome Beauty and Winesap. These are five of the best standard varieties of apples—practically covering the entire season.

The tree is highly ornamental; full of beautiful white-to-pink blossoms in the early spring. When the dainty pink buds burst into full bloom, it is a sight to behold. These are followed in the late summer and early fall by a bountiful supply of five different kinds of apples. Think of how handy it will be for the housewife—plenty of all kinds of apples for apple pie and apple sauce!

PRICE: 2-yr., sturdy trees, 9/16 in., 4 to 5 ft., \$1.50 each; 5 or more at \$1.40 each. No further discount.

HARDEE Peach

U. S. PLANT
PATENT No. 120

The New Giant BLUEBERRIES

About the Size of Grapes

The biggest money-maker of all time as a commercial proposition. Easy to grow. Brings from 55c to 75c per quart —\$400.00 per acre the third year.

Should be planted 5 by 10 feet. Plant no less than two to insure pollenization. Bushes grow six to eight feet high. Hardy, never winter-kills.

Blueberries must have an acid soil, good drainage, and moderate supply of moisture. Most every farm has low acid soil which is considered worthless that will grow this profitable crop. Acid soil can easily be created by mixing with your surface soil well-rotted leaves, pine needles, sawdust, or the Sodas Acid Humus which we offer on page 43. Cultural instructions on the planting and care of blueberries will be mailed with each order. You may also write U. S. Department of Agriculture at Washington, D. C., for bulletin on growing Blueberries.

We are listing blueberries in 1-, 2-, 3-, 4-, and 5-year-old grades. The 4- and 5-year-old plants will produce berries the first year after planting.

We consider the Rubel the best variety to plant as it is a much more thrifty grower; therefore, bears fruit earlier than some other kinds.

If you want berries right away, buy the four- or five-year-old plant.

The demand for blueberry plants so far exceeds the supply that we do not believe there will be enough to go around. Therefore, if we should be sold out of any one variety when your order is received, we reserve the right to substitute another variety of equal merit. However, we cannot guarantee varieties in the four- and five-year-old grade; these will be sold as cultivated blueberry only. However, these will consist of some of the varieties listed.

We are listing four varieties: Pioneer, early; Harding and Rancocas, midseason; Rubel, late.

SEE BACK COVER FOR FURTHER DESCRIPTION.

New Peach Resists Zero Weather

A new peach developed to resist excessive cold. **END WINTER KILLING WITH HARDEE.** Has been tested by the Ohio Experimental Station for the past several years and found that they came through the driest summer and the coldest winter undamaged, whereas the balance of the peach crop was a complete failure. These experiments have convinced us that Hardee is the coming peach for all northern climates.

The fruit is large to above large, Elberta type, ripening a little later, yellow freestone, highly colored, is distinct and delicious. Firm flesh, of the best quality, thick-skinned, making it an excellent shipper. Vigorous grower and will produce a nice crop the third year on most any kind of soil or climate.

Commercial growers can now afford to plant this grand new variety because of the new low price. Be sure and write for our wholesale prices on large lots.

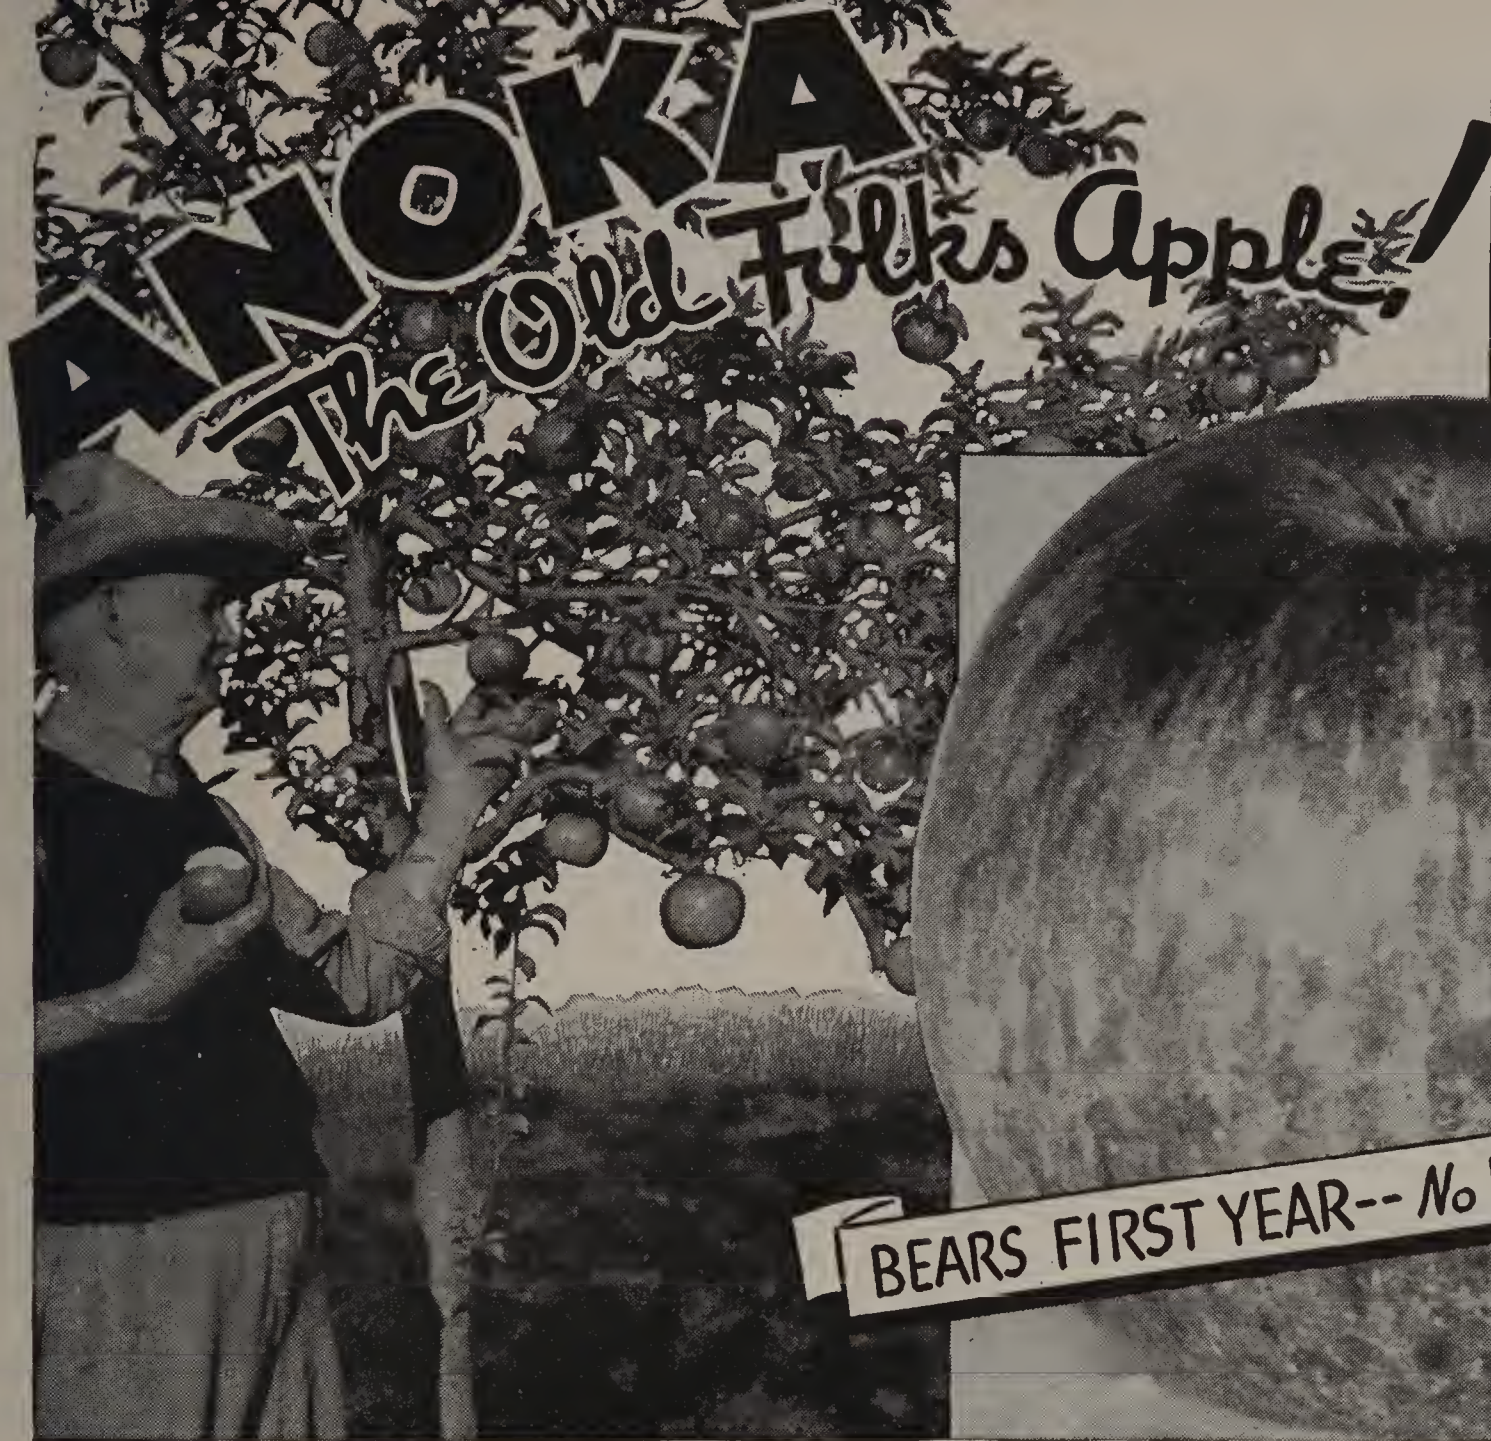

Hardee is considered one of the best yellow freestone peaches, and you are also assured of the trees withstanding sub-zero weather—the hardiest of all peach trees.

Although Hardee eventually matures to a tree of a size intermediate between Elberta and J. H. Hale, it does not attain the height of common varieties in the nursery row. Due to this fact (which undoubtedly contributes to its hardiness) it is impossible to grade HARDEE according to height. Caliper must govern in all cases.

BEARS FIRST YEAR-- No Waiting for Fruit

Often Bears in One Year — No Waiting for Fruit

The second year, big, full sized crop; earliest and heaviest bearing apple. Hardy in all climates; never winter-kills. Can be grown anywhere in the United States. Ripens in August but can be used a month earlier. Apples are good sized, well formed, beautifully colored. Has proven to be one of the very best early summer apples for all purposes.

Every home should have Anoka. One or two trees in your yard will furnish you a bountiful supply of fruit without long years of waiting.

2-yr., 7/16 to 9/16 in., 3½ to 4½ ft. trees Each 3 10 \$0.50 \$1.35 \$4.00

COPE'S Seedless Pear

A Brand New Variety—offered for the first time this year.

This original Seedless Pear is being handled under license from Seedless Pear Nurseries, Inc., the patent applicant. No tree genuine without the label.

Fruit growers in Ohio are so enthused over this new seedless pear that they are planting heavily in lots of localities. It has been tried and tested for the past several years and found to be superior in many ways to other varieties. Compares favorably with Bartlett. As you know, the Bartlett is considered the best standard variety at the present time, and as you will note by the testimonials below, this new seedless pear has all the good qualities of the Bartlett plus the following additional features:

Ripening 10 days later than Bartlett, this pear will command highest prices, for it comes on the market when pears are at a premium.

Practically seedless and coreless—solid all the way through. The best canner, as there is no waste of time or fruit.

A thriftier grower, heavier bearer—bears in three years; will do well on most any soil. Has everything one can ask for in hardiness.

Main feature is being very blight resistant, as no blight has shown on this pear since it was originated.

This seedling pear, without seeds and practically coreless, was found by Mr. Cope, of Columbiana County, Ohio, some ten years ago. Mr. Cope has followed the fruit game for fifty years and is willing to stake his reputation on this great pear.

C. W. Ellenwood, Associate in Horticulture, Ohio Experiment Station, says: "This seedless pear is worthy of extensive trial because it is a pear without seeds and practically coreless. It resembles Bartlett in many ways; much like Bartlett in size, flavor, color and quality, but ripens a week to ten days later. Like most other seedless fruit it does develop an occasional seed."

Frank Agnew, President of the Mahoning County Horticultural Society, of Ohio, says: "The original seedless pear tree at five years of age was loaded with three bushels of fine fruit. Fruit was large in size, fine quality and color."

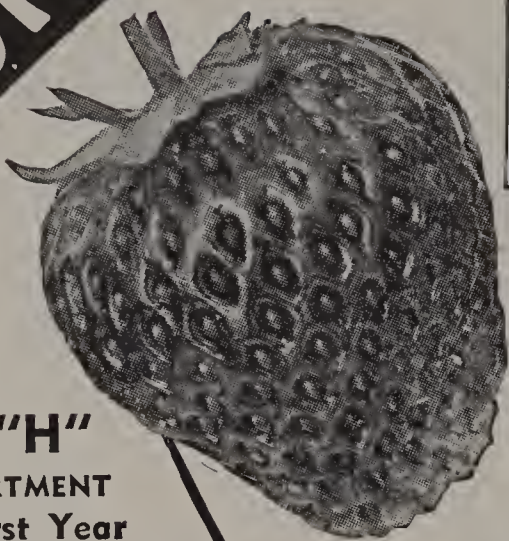

PRICE: 2-yr., 7/16 to 9/16 in., 3½ to 5 ft. trees Each 5 or more \$1.50 \$1.40 each 2-yr., 11/16 in., 5 ft. and up trees 2.25 2.00 each

SOME UNUSUAL NOVELTIES AND

The Thornless Rose

A Rose without thorns! A new rose by Prof. N. E. Hansen—the originator of many new varieties. A sturdy, upright plant, decorative in winter with its red seed pods. Will stand 50 below zero without protection. Fragrant pink blossoms. Truly thornless.

Price: 55c each.

Rosa Rouletti

The smallest rose we know of. Grows 6 to 7 inches high; dense, small foliage; 3/4 to 1 inch, double, rose-pink flowers continuous from early summer until frost. Strong, 2-yr., field-grown bushes, only 40c each; 3 for \$1.05.

CHRISTMAS ROSE "Helleborus Niger"

A dwarf-growing hardy plant which grows up through the snow and flowers in the dead of winter. Large single bell-like white flowers last for weeks. Leathery evergreen foliage. Price: 80c each; 2 for \$1.50, Net, Postpaid.

SOME POPULAR FAVORITES

Unusual and Charming Shrubs

TO ADD STYLE AND DIGNITY TO YOUR HOME PLANTING

Daphne
Cneorum

Acid-Loving Plants and Shrubs

BROADLEAF EVERGREEN and ACID LOVING SHRUBS, such as Azalea, Daphne, Mountain Laurel and Rhododendrons, grow best in an acid soil. This condition can be induced by application of aluminum sulphate, one-half to one pound, or sulphate of ammonia, one to three pounds, sprinkled evenly over a square yard of surface and spaded in.

Daphne Cneorum (Garland Flower). Very dwarf shrub, with spreading branches covered with blue-green leaves. Almost evergreen. Each branch and stem is tipped with dense cluster of rose-pink, deliciously fragrant flowers, in April and May, and at intervals during the summer.

Hardy but should be given a sunny location in northern states. Strong, 8-10 in. bushes, balled in peat and burlapped, at only \$1.10 each; 3 for \$2.80.

Hardy Azaleas Here is the assortment of color you have been waiting for. We are now pleased to offer the Azalea in four colors: shell-pink, scarlet, red, and yellow. Imagine your garden with this array of color in May—strikingly beautiful. The large, 2½-inch flowers appear in bunches at the ends of the shoots. Hardy. Grows about 2 feet high, and does well in both sunny and partially shaded locations. We can supply same in the following variety and colors: Nudiflora—shell-pink; C. B. Van Ness—scarlet; Buff, scarlet to orange; J. C. Van Tol—yellow. SPECIFY VARIETY WANTED. Price: Strong, 6-10 in. bushes, 50c each; 3 for \$1.25.

AZALEA MOLLIS. Assorted colors. Strong, 12-15 in. bushes, balled in peat and burlapped, \$1.40 each; 3 for \$3.70.

Rhododendron Maximum This is the most popular and grandest species and most used for massing and naturalistic planting of all broad-leaved evergreens. Flowers are in shades of rosy blush and white. Foliage very large and smooth. Blooms in July. 2-yr., 12-18 in. bushes, 50c each; 3 for \$1.25.

Rhododendron Catawbiense The hardiest of all Rhododendrons, can be successfully grown in northern climates. The Rhododendron is an ornamental shrub that will solve your problem for shady locations as it will grow and do well without much sunlight. In June, every branch has large clusters of rose-purple blooms 4 to 6 inches across. The foliage is the most beautiful of the Rhododendrons, is evergreen all year through. Guaranteed field-grown. Well-rooted, twice transplanted stock, 8 to 12 inches, 3 canes, only \$1.10 each; 3 for \$2.80.

Mountain Laurel (Kalmia Latifolia). This matchless Laurel is, without question, one of the most beautiful and attractive of the broad-leaved evergreen shrubs on account of its dark green, lustrous foliage and masses of glorious pink or rose-colored flowers, appearing in lavish profusion in late spring and early summer (July); its quaintly formed flowers are borne in great trusses—even small plants are gay with them. Most impressive in masses. Strong, 12 to 15 inch bushes, 50c each; 3 for \$1.25.

REAL Aristocrats

American Holly (*Ilex Opaca*). An evergreen tree which has been acclimated to northern states. A moderate grower with spreading, short branches tapering upwards to a narrow head. Broad, oak-like, shiny Evergreen leaves with spiny teeth. Bush is covered with red berries in the fall, which remain on the branches nearly all winter. **Strong, 18-24 in. stock, only 75c each; 3 for \$2.00.**

American Holly

Blue Hydrangea Loveliest Novelty Ever Introduced. Immense blooms of most charming blue color imaginable. Flowers in great profusion. Blooms pink flowers on the one-year stems, followed by blue on the two-year wood. In other words, it is necessary to have the two-year-old wood to have the Blue Hydrangea. Cover in winter to protect from frost. **Fine, 8-12 inch bushes, 90c each; 3 for \$2.45.**

Blue Hydrangea

Witch-hazel (*Hamamelis Vernalis*). Something New! Flowers in the Winter. In January, February and March, great masses of orange and yellow bloom. Rarely exceeds six feet in height. Hardy, sweetly fragrant. An excellent new shrub for border planting or individual specimens. Would be an outstanding novelty in your town. **Fine, 1 to 2 ft. bushes, 35c each; 3 for 90c.**

Firethorn There is no other fruiting evergreen shrub that is so attractive throughout the year as this Firethorn. This shrub has an upright, compact habit of growth, very attractive bright green foliage, which stays on all winter. It has large trusses of white flowers in the summer, followed by brilliant orange-scarlet berries, which persist all winter. Hardest of the Firethorns. **18-24 in. shrubs, balled and burlapped, 85c each; 2 for \$1.50.**

New Orange Buddleia (*Asclepias Tuberosa*). The only Butterfly plant with true orange flowers. During the months of July and August this unusual plant produces immense numbers of brilliant orange flowers. It can be successfully grown in any type soil in any locality. Withstands severe winters and hottest summers. **Fine, 12-18 in. plants, 35c each; 3 for 90c.**

Viburnum Lantana (Wayfaring Tree). Large gray-green leaves. Upright growth. White flowers in May, clusters of reddish black fruit follow blooming period. Grows 12 to 15 feet. Plant 5 to 6 feet apart. 2-yr., 18-24 in. bushes, 35c each; 3 for 90c.

Unusual and CHARMING

Tree Form Hydrangea P. G.

Beautiful, well developed trees of the true P. G. type that are ready to jump right in and grow. Good roots and plenty of branches. We don't need to tell you where to plant them—they're beautiful anywhere. Very large clusters of white flowers, changing to pink. A bargain at the price we ask. Heavy, 3-4 ft. trees, 90c each; 3 for \$2.50.

Hydrangea P.G.
Tree Form

Smoke Tree (Purple Fringe; Rhus Cotinus).

UNIQUE, spreading, treelike shrub with large leaves. Overhung in midsummer by cloudlike masses of mistlike flowers having the appearance of smoke. Foliage

changes to a brilliant red and yellow in fall. Good as a

single specimen on the lawn, or to mass with tall shrubs. Fine, 15-18 in. bushes, 50c each; 3 for \$1.35.

Bargain No. 33

- 1 Kerria Japonica
- 1 Beauty Bush
- 1 Korean Spirea
- 1 Phila. Virginalis

\$1.25 Net,

Korean Spirea (Trichocarpa). A handsome new shrub acclaimed the best of all Spireas. Grows 4 to 6 feet tall, and forms a big dome-shaped bush covered in spring with large, rounded clusters of snowy flowers marked with darker eyes. Very hardy. More robust and blooms two weeks later than Spirea Van Houttei, and is far more desirable. Strong, 2-year, 18-24 in. shrubs, 40c each; 3 for \$1.10; or \$3.85 per doz.

Kerria Japonica (Beautiful Japanese Rose). In June, each shrub is heavily covered with golden flowers, like pretty, fluffy balls in shape, and there is enough bloom throughout the summer to make a very pretty display. Dark green leaves; blooms 1½ inches or more across. Grows to a height of 8 feet. 18-24 in., 50c each; 3 for \$1.35.

Philadelphus Virginalis Wonderful new Mock Orange. The most beautiful white-flowering shrub that has been introduced for many years. Has very large, semi-double blooms, pure white, sweetly scented, appearing in clusters of six or seven. Closely resembles a bride's bouquet of orange blossoms; ranks among the best for cutting. Vigorous, tall grower, used with striking effect as a hedge; also makes fine individual specimens. Fine, 2-yr., 18-24 in. bushes, 40c each; 3 for \$1.10.

Beauty Bush (Kolkwitzia amabilis). Exquisite! New shrub from China. Covered early in May with the utmost profusion of small, bell-shaped, clear pink flowers with brownish spots and veins. The tiny rose-colored buds are fascinating hooded with fuzzy jackets which remain to decorate the seed pods. Graceful the year 'round, and perfectly hardy.

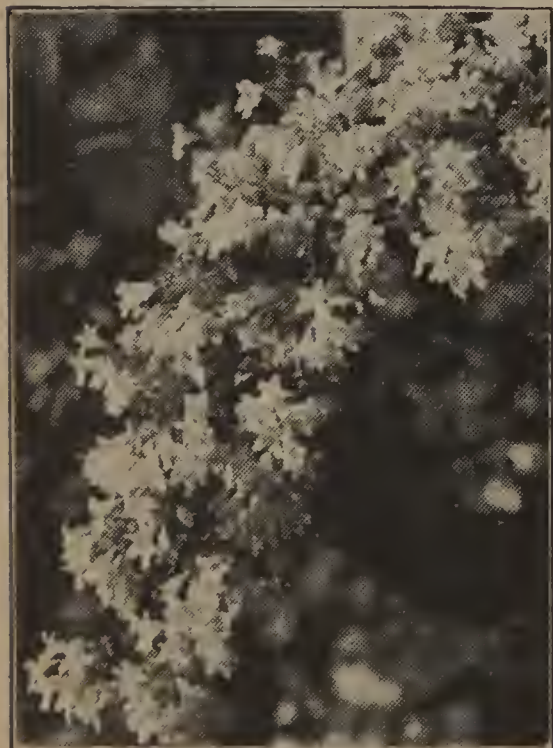

Strong, 2-yr., 15-18 in. bushes, 45c each; 3 for \$1.20; \$4.10 per doz.

COLORFUL Flowering Shrubs Each a Beauty

Yellow Ninebark Golden Spirea

This is a very vigorous Spirea. Striking white blooms. The leaves of this variety are a golden yellow. After the flowering season is over, the flowers are followed with orange colored pea pods. Strong, 2-yr., 18-24 inch shrubs, 35c each; 3 for 90c; or \$3.00 per doz.

Blue Spirea (*Caryopteris mastacanthus*). The perennial shrub with aromatic leaves. Its habits are similar to the Butterfly Bush; that is, the tops die down to the ground every year but the roots are perennial. It grows upright and has a globose, very compact habit of growth. It rarely grows more than 2 feet in height. Beginning in September, it is completely covered with clear blue flowers until frost—a very rare color in flowers at that time of the year. It is extremely showy. Splendid as a fall cut flower. Strong plants, 40c each; 3 for \$1.00.

Chaste Tree (*Vitex macrophylla*). Lovely lavender-blue flowers. A color rare in hardy shrubs. Blooms from July till frost. Succeeds anywhere; grows 6 feet tall. Strong, 2-yr., 2-3 ft. bushes, 75c each; 3 for \$2.00.

Ile de France New! Purple Buddleia. Rich purple color. Tall flower spikes, often a foot tall. This variety greatly surpasses all other Buddleias for brilliance of color, grace of flower spikes, and uniform habit of growth. Blooms from August to late fall. Strong plants, 40c each; 3 for \$1.00.

French Lilacs Until you have seen these new Lilacs you cannot realize how beautiful they are. They are perfectly hardy. They commence blooming very young, generally the next year after planting. We offer them in the four best varieties, as follows:

ALPHONSE LAVALLEE. (Double). Clear lavender-violet, deeper without than within.

JAN VAN TOL. (Double). Pure white. Very large trusses and a very good grower.

MICHEL BUCHNER. (Double). Exquisite pink-lilac buds, merge into blue when open.

PRES. GREVY. (Double). Large trusses of blue flowers. A great favorite.

Above four varieties, strong, 2-yr. bushes, 40c each; 3 for \$1.00.

Buddleia Hartwegi

New! The finest of all the summer-flowering Buddleias. As a summer cut flower plant and as an ornamental lawn shrub, it is unsurpassed in beauty and usefulness. The flowers do not sunburn as do other Davidi varieties, and the tip flowers before the basal flowers have faded. Deep lavender coloring, extra long spikes. The foliage is very heavy and rich dark green. Does not winter-kill. Similar to New Fortune. Strong plants, 50c each; 3 for \$1.40.

Field Grown Shrubs

ALL STRONG 2 TO 3 YEAR OLD WELL ROOTED

Althea (Rose of Sharon). Beautiful treelike shrub, blooming late in August and September with a profusion of large and brightly colored flowers. Grows 10 to 12 feet high. Attractive as a specimen or for hedges. Your choice of purple, red or pink. All double flowering.

SPECIAL. Mixed colors Althea, 2-year, strong bushes. 15c each; 6 for 85c; 12 for \$1.65; or \$12.00 for 100. Remember, if certain colors are wanted, they must be bought at the 19c price.

Red Chokeberry Pretty white flowers in April and May, with bright red berries and foliage in autumn. Grows to 6 feet at maturity.

Dogwood (Red Twig). One of the best native shrubs; free flowering; very handsome when in bloom, and with its white berries on red stems in the fall. Grows compactly, 6 to 10 feet in height.

Deutzia, Pride of Rochester Large, white flowers tinged with rose. Profuse bloomer. Very hardy. Grows 6 to 8 feet tall, useful for specimens or background.

Purple Lilac It is hard to outclass this old-fashioned purple Lilac. Early prolific bloomer, very fragrant. Very fast grower.

Forsythia Intermedia Earliest blooming. Lights up the garden with masses of yellow flowers, often before the snow is gone. Tall grower.

Mock Orange (Philadelphus Coronarius). Tall, hardy and vigorous. Blooms in May, in graceful sprays of large, white, fragrant flowers. Grows 8 to 10 ft. tall.

Weigela Rosea Beautiful pink, trumpet-shaped flowers May to July. Grows 5 to 6 feet tall. A good shrub; good flowers, good foliage, easy to grow.

Red Snowberry (Symphoricarpos vulgaris). Often called Coralberry or Indian Currant. Similar to White Snowberry but with red berries.

White Snowberry (Symphoricarpos racemosus). A desirable shrub with small, pink flowers, followed by large, white, waxlike berries, which hang on the plant through most of the winter. Is very showy and succeeds everywhere. Does well in shade. Grows 3 to 4 feet tall.

Honeysuckle, Tartarian Pink

Bright pink flowers, followed by red berries in the fall. Bushy, upright. Grows 8 to 10 feet high.

Any Shrub on
This Page

24c each
3 for 65c

High Bush Cranberry (*Viburnum Opulus*). Magnificent shrub, of upright spreading form, with smooth, light gray branches and broad, oval, 3-lobed, bright green leaves. Produces small, white flowers which are borne in broad, flat clusters surrounded by a ring of large, sterile flowers. These are followed by very showy scarlet berries, which cling to the bush all winter. Grows 8 to 10 feet tall.

American Beautyberry A native, large-leaved shrub, which blooms during August with small axillary clusters of pink flowers; these are followed by conspicuous violet-colored berries. If top should freeze, young shoots will come up and flower and fruit the next season.

Tamarix Africana Tall shrub, 8 to 10 feet high, with fine feathery foliage and small, bright pink flowers, in slender racemes in April and May. Splendid for planting in damp or other places.

Golden Elder (*Sambucus nigra aurea*). A variety with golden yellow foliage and large, flat clusters of white flowers. Contrasts beautifully when planted with green-leaved shrubs. Grows 6 to 8 feet high, but should be pruned back severely each spring to secure denser and bright foliage.

Hypericum Aureum (Golden St. Johnswort). A showy shrub of stiff, dense habit, foliage bluish; flowers, golden yellow, from August to October. Prefers moist soil.

Japan Quince (*Burning Bush*). Very early in the spring this fine, attractive shrub is completely covered with dazzling scarlet flowers, followed by small, fragrant, quince-shaped fruits. Foliage is dark, glossy green. Very desirable for single specimens, also hedges.

Snowball Well known favorite. Lovely white flowers, which appear in numerous, compact balls. Valuable for specimen plants and also for grouping and massing.

Rose-Acacia (*Moss Locust*). Elegant shrub, with light green pinnate leaves, and long, graceful clusters of pea-shaped, rose-colored flowers in June and often later. An attractive addition to any planting.

Spirea Van Houttei The flowers are pure white, and borne in dense clusters along the whole length of the branches. Excellent as a hedge plant or for grouping. Well branched, 2-yr., 12-18 in. bushes, 8c each; 6 for 40c; 12 for 65c; or 50 for \$2.50. 2-yr., 18-24 in. bushes, 14c each; 6 for 65c; 12 for \$1.15; or 50 for \$4.25. Heavy, 2-3 ft., bushes, at 20c each; 6 for \$1.00; 12 for \$1.85; or 50 for \$5.50.

Calycanthus The Sweet-Scented Shrub or Strawberry Shrub; also called Chocolate Shrub and Carolina Allspice. Flowers very double, a brownish purple in color, and deliciously fragrant. Blooms nearly all Summer, and is one of the most desirable shrubs; even the roots are very fragrant. Attains a height of 8 to 10 feet.

Each

3 for 75c

Hydrangea A. G.

Spirea Douglasi

Another handsome, new, pink Spirea that you will want to include in your plantings. Upright in growth, with reddish brown branches and narrow, oblong green foliage. Bears spikes of beautiful deep rose colored flowers in July. 6 to 7 feet at maturity.

Spirea Anthony Waterer

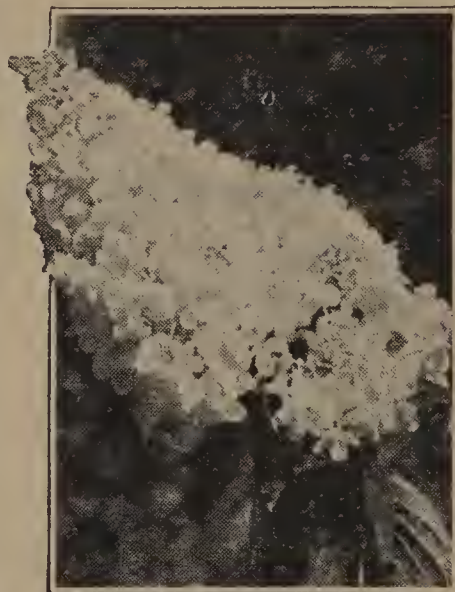

A dwarf variety, growing 15 to 20 inches high, covered with large heads of crimson flowers. Foliage is very handsome, being variegated with creamy white or yellow. If flowers are removed as they fade, it will cause the plant to keep up a continuous bloom until freezing weather occurs.

Hydrangea P. G.

Use this variety for showy bloom and elegant effect. This lovely, showy shrub produces in abundance during August and September, clusters of white flowers which gradually change to pink. Valuable for winter decorations if flowers are allowed to dry on bush. Useful for foundation planting or for massing in borders. Hardy, easy to grow and blooms the first season planted.

Hydrangea A. G. (Hills of Snow).

Large, flat clusters of white blooms from June to September. The most hardy of the Hydrangeas, and especially useful for shady places. Excellent for solid low borders or in foundation planting. Very popular shrub.

Hydrangea P. G.

No planting is complete without Hydrangeas. They are unsurpassed for showy bloom and elegant effect.

— Any Shrub on This Page

Weigela Floribunda

A beautiful, comparatively new shrub, with large, showy red flowers appearing in profuse clusters and almost hiding the glossy green leaves. Commences blooming early in spring, and continues all summer. This attractive shrub should be in every border planting.

Weigela Floribunda

Weigela, Variegated

Sprays of rosy pink flowers like Floribunda except they are deep pink. Leaves are beautifully variegated green and white.

Grows only 2 to 3 feet high. Very beautiful.

Variegated Weigela

Russian Olive

Rugged, tree-like shrub, growing 10 to 12 feet high. Foliage is a beautiful, silvery gray, contrasting sharply with other shrubs. Flowers are deep golden and very fragrant, followed by ornamental yellowish brown fruits with silver scales.

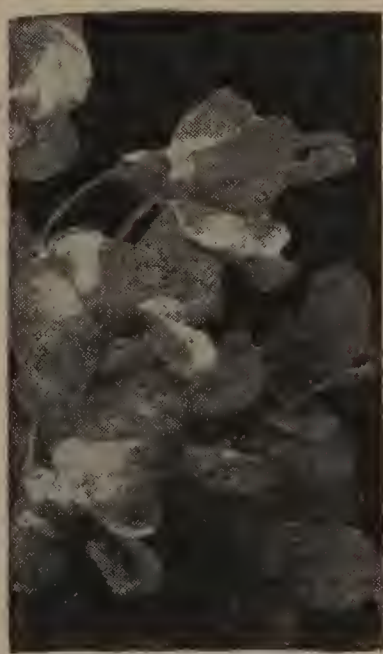

Russian Olive

Siberian Pea Shrub

Tall shrub, 10 to 12 feet high, with bright green compound leaves and many small clusters of yellow flowers in May and June. Useful for group or background planting. Hardest and best hedge shrub for the Northwest.

Deutzia Crenata

Siberian Pea Shrub

Lilac, Persian Purple

A decided improvement over the common Lilac. A shrub with slender, arching branches, attaining a height of 5 to 10 feet. The foliage is small, the flowers bright purple. Blooms in May and June. A much more profuse bloomer than the common, and does not sprout so much from the roots. We consider the Persian much preferable.

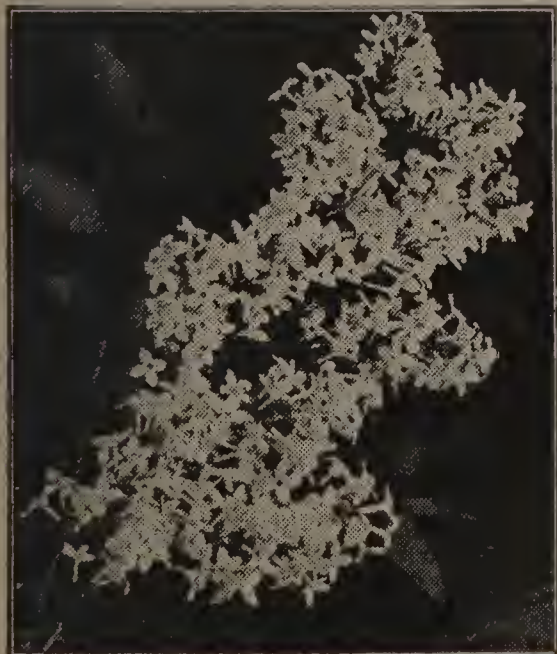

Deutzia

Crenata Here is a Deutzia that is different, and one which should be included in every planting. Beautiful, double pink flowers thickly stud the graceful,

upright branches in May. Mature to 3 to 5 feet.

Oak-Leaf Hydrangea

(Hydrangea quercifolia). Handsome 3-lobed leaves measuring 4 inches across, color to bright purplish red in autumn and remain until winter. Pyramidal white flower panicles measure 8 to 12 inches long. Blooms July. Grows 4 to 5 feet.

HEDGE PLANTS

Canadian Hemlock (*Tsuga Canadensis*). Although the Hemlock is an evergreen, it is so widely used for hedging purposes that we are listing it along with our Hedge plants. A remarkably graceful and beautiful native tree, with drooping branches and delicate foliage like that of the Yew; distinct from all other trees. The finest evergreen in heavy shade, both beautiful and dependable wherever used. Its refined foliage is lacy, close-set and darkly lustrous, in rather flat fronds which droop gracefully. Although capable of great height, it is best known as a moderate grower adapted to severe pruning; used at corners, or as foundation screens; or in formally sheared high hedges. The picture at the right illustrates what a beautiful, compact hedge you may have with this evergreen; excellent to hide those unsightly views.

Canadian Hemlock Hedge

Red Barberry Similar to Barberry Thunbergi in all respects except color. True red-leaved Barberry as the stock we have to offer is grown from cuttings instead of seed. Our stock of plants is grown in 2 1/4 inch pots from cuttings, making a much more fibrous root growth than those grown in beds; these plants will start faster and make more growth than the common Barberry seedling. Also, if grown in this manner, you are assured of genuine red Barberry.

Russian Mulberry Hedge

Russian Mulberry Hardy in all states—never winter-kills. Superior to other kinds, as it makes a dense hedge from the ground up. Unlike most other hedging varieties as to growth and shape of leaves; very attractive foliage, making an outstanding and beautiful hedge, altogether different than old common varieties. Cannot be surpassed for tall hedges to hide unsightly views, or can be pruned to any height desired. Be the first in your locality to get started with this outstanding hedge. **NOTE ACTUAL PHOTO.**

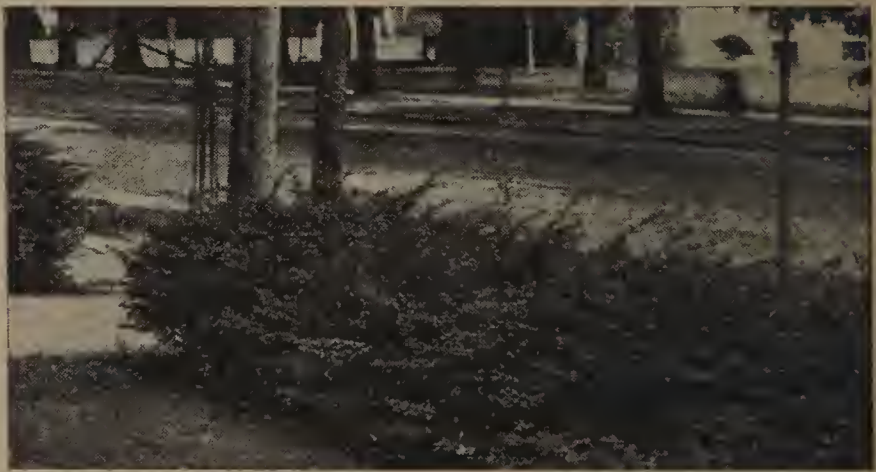

Amoor River North Privet One of the best hedge plants because of its extreme hardiness. It is of similar form and habit to the well known California type, but much hardier. Of fine, upright growth with lustrous dark green foliage, nearly evergreen. Grows quickly, making a hedge the first year, and succeeds in practically all soils. Especially valuable for hedges and borders in cold exposed locations. When planting, cut back to 4 inches above ground to make hedge bushy at bottom.

Chinese Elm Hedge Chinese Elm makes one of the finest of hedges. Especially desirable for states of light rainfall and where extreme hardiness is required. The hedge, limbs clear to the ground, is a bright rich green from very early in the spring, as it is much earlier than other hedges and carries its foliage, which colors with frost, way into the fall. Trim same as Privet or other similar hedges.

Chinese Elm Hedge

Japanese Barberry (*Berberis Thunbergi*). Immune from rust. Dwarf growing, uniformly bushy and rounded in form, numerous leaves covering thorny twigs. As a filler edging for shrubbery, as foundation screen in front of porches, as a hardy, low hedge, it is unsurpassed. Foliage bright, rich green, turning to a blaze of gold and crimson in autumn. Small creamy white flowers, followed by oval, red berries, which gleam along every branch in late fall, and far into winter.

Japanese Barberry Hedge

CLIMBING VINES

Honeysuckle, Heckrotti

New! The Wonder plant of the Century. Ever-blooming. A Lonicera that will fill that long-felt need of a variety that will produce continuous bloom. Blooms all summer with beautiful red flowers. Very highly scented. Wonderful foliage. We feel sure that you will not regret placing several of these in your order, for this wonderful vine will give you everlasting joy. 2-year, No. 1 vines, 45c each; 3 for \$1.15.

Honeysuckle, Hall's Japan

Strong, vigorous vine, with pure white flowers changing to yellow. Extremely fragrant, and blooms all summer. 2-year, No. 1 vines, 25c each; 3 for 60c.

American Bittersweet Handsome, glossy foliage, and large clusters of beautiful, orange-crimson berries, remaining all winter. Charming for winter house decorations. 2-year, No. 1 vines, 35c each; 3 for 90c.

Clematis Jackmani Immense flowers of an intense violet-purple color continuously throughout the summer. Strong, 2-year vines, only 80c each; 3 for \$2.25.

Clematis Virginiana A profusion of white flowers in August and September, followed by curiously beautiful seed-pods, making this species an interesting feature for big-scale planting. A rampant grower. 2-year vines, 25c each; 3 for 60c.

Clematis, Mme. Baron-Veillard Here is a beautiful Clematis whose early blooms come in warm pastel shades of lilac-rose, then as the days get cooler, the color becomes more intense. Tall growing (10 to 12 feet), sturdy of growth, and very profuse in bloom. The flowers are moderate in size, borne in generous clusters, and of unusually delicate beauty. Strong, 2-year vines, only 75c each; 3 for \$2.00.

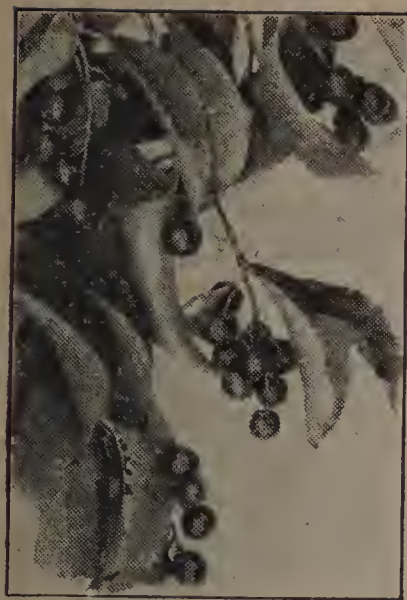

Clematis Montana Undulata New! Exceedingly hardy! A very prolific bloomer, sometimes so many blossoms that they pile one on another and almost hide the rich waxy green foliage. Flowers are a delicate shell-pink, and very similar to beautiful Anemone blossoms; have pretty little, silky, yellow centers. This variety has been known to stand temperatures of 30 degrees below zero, unprotected. Strong, 2-year vines, only 75c each; 3 for \$2.00.

Kudzu Vine Hardy. Large foliage and dense shade. Runs 30 to 40 feet in one season. Blooms in August. Rosy purple, pea-shaped flowers, in small racemes. 2-year, No. 1 vines, 25c each; 3 for 60c.

Boston Ivy One of the finest hardy climbers for covering walls and trunks of trees, as it clings firmly to any surface. Deep green in summer, bright red in autumn. 2-year, No. 1 vines, 40c each; 3 for \$1.10.

Silver Lace Vine Unusually charming. Climbs gracefully anywhere. Grows very rapidly, averaging 25 feet in a season. A well grown specimen is a cloud of lacy, misty white shot with tints of cream and pale rose, of exquisite effect. Blooms late summer and fall. Strong, 2-year vines, 50c each; 3 for \$1.35.

Chinese Purple Wisteria Elegant and very rapid growing. Has long, pendulous clusters of pale blue flowers in May and June, and in autumn. 2-year, No. 1 choice specimens, from blooming wood, 45c each; 3 for \$1.20.

WHITTEN-ACKERMAN

Japanese Red-Leaved Maple

All 2- and 3-year-old, strong and vigorous, well branched and well rooted. We offer no small, spindly whips.

Siberian Crab (*Pyrus baccata*). The Superb Beauty of Ornamentals. We might call this the three-purpose Crab, for it is not only unexcelled as an ornamental tree, because of the extremely large white to pink, fragrant flowers, but also for its fruit, and if used as a windbreak, it gives the whole place a living frame of beauty. Very hardy. Has dense bright green foliage. Grows on any soil. Bears early. Its bright red and yellow fruit fine for jellies and pickling. 2-yr., 18-24 inch trees, 25c each; 5 for \$1.00.

Arnoldiana Crab A very popular variety; early flowering, producing an abundance of semi-double pink flowers. Very attractive foliage. 2-yr., 2-3 ft. trees, 35c each; 3 for 90c; or 10 for \$2.50.

Bechtel's Double Flowering Crab

A Rose in Disguise! The only genuine Double-Flowered Crab. Makes a medium sized tree; perfectly hardy. When in bloom, appears to be covered with delicate pink, perfectly double, small, roselike flowers of delicious fragrance. Blooms very young. 2-yr., 18-24 inch trees, 55c each; 3 for \$1.50.

Magnolia Soulangeana This is the most decorative and popular of the Hardy Magnolias, producing a wealth of very large, rose colored blooms just before the leaves come in the spring. The blooms measure from 3 to 5 inches across. Leaves large and glossy. It will attain a height of from 8 to 10 feet when fully matured. 2-yr., 18-24 inch trees, balled in moss and burlapped, only \$1.50 each; or 2 for \$2.50.

Japanese Red-Leaved Maple Hardy, dwarf growing tree, seldom maturing over 10 ft. Their indented leaves are vivid blood-red in summer, which dulls to bronzy purple-red or bronze-green toward fall. Fine trees, 2-yr., grafted, 2-3 ft., balled in moss and burlapped for best results, at only \$2.35 each; or 2 for \$4.25.

Paul's Double Scarlet Thorn Very hardy tree with attractive deep cut leaves; in May-June it is covered with double, scarlet-red flowers, followed by showy red berries. Low growing. Strong, 2-yr., 3-4 ft. trees, \$1.35 each; or 3 for \$3.65.

Shining Sumac (*Rhus copallina*). Strong tree with dark green, compound foliage, turning dark brown in autumn. Panicles of brilliant red flowers in late summer; bright red berries in autumn. 2-yr., 18-24 inch trees, 30c each; 3 for 75c; or 10 for \$2.00.

Cornus Florida (White Flowering Dogwood). White flowers, before leaves appear. Grayish green foliage, turning red in fall. Tall grower. Strong, 2-yr., 2-3 ft. trees, only 55c each; 3 for \$1.50; or 10 for \$4.40.

Cornus Florida Rubra (Red Flowering Dogwood). Covered in early spring with masses of large, rose-red blooms. Red berries in fall. Slow growing. Strong, 2-yr., 2-3 ft. trees, only \$1.50 each; 3 for \$4.25; or 10 for \$12.75.

ORNAMENTAL TREES

Sieboldi Jap. Flowering Cherry

Sieboldi Flowering Cherry

No tree could be more lovely than are these in their first stage of deep colored round buds; then their second stage of part buds and part opened flowers; followed by a smothering expanse of full-blown flowers. When in full bloom, flowers are semi-double to double pink, varying white tinged with red, according to weather conditions. The best all-around flowering cherry. Fine, 2-yr., 3-4 ft. trees, \$1.00 each; 3 for \$2.75.

Yoshino Japanese Flowering Cherry

The loveliest of all kinds, is found blooming along the Tidal Basin at Washington. Buds are red, flowers are single, blush-pink fading to white with reddish center. Fine, 2-yr., 3-4 ft. trees, \$1.00 each; 3 for \$2.75.

Prunus Triloba

(Double-Flowered Plum). The Rose Tree of China. This small growing tree is covered with double pink blooms early in the spring, before the leaves appear. Seldom attains a height of more than 8 feet. Strong, 2-yr., 2-3 ft. trees, 45c each; 3 for \$1.00.

Prunus Cistena

A New Purple Leaf Plum. Shows more red in the colored leaves, lower growth and more compact than the common variety, glossier leaves. This dwarf tree comes out red in the spring, stays red all summer and is bronze-red in the fall. Beautiful single flowers in May. Strong, 2-yr., 2-3 ft. trees, 35c each; 3 for 90c; or 10 for \$2.50.

FREE! 1 Tulip Tree

Tulip Tree

An Ornamental Tree with Unusual Flowers! A large and stately tree with smooth bark, glossy light green leaves and spreading branches. Flowers are 1½ to 2 inches long, light greenish yellow and are tulip shape; blooms appear late May and early June. Fine 2-3 ft. trees, 25c each; 3 for 60c; or 10 for \$1.70.

Moss Locust

(Tree Form Rose-Acacia). The same as shrub Rose-Acacia (see page 35), with exception that this variety is grown in tree form. Very hardy. Strong trees, with 3-foot stems, 90c each; or 3 for \$2.50.

Kwanzan Japanese Flowering Cherry

(Sacred Gate). Flowers are very full and double, deep pink or old rose, varying in tone according to weather conditions. Fine, 2-yr., 3-4 ft. trees, \$1.00 each; or 3 for \$2.75.

Judas Tree

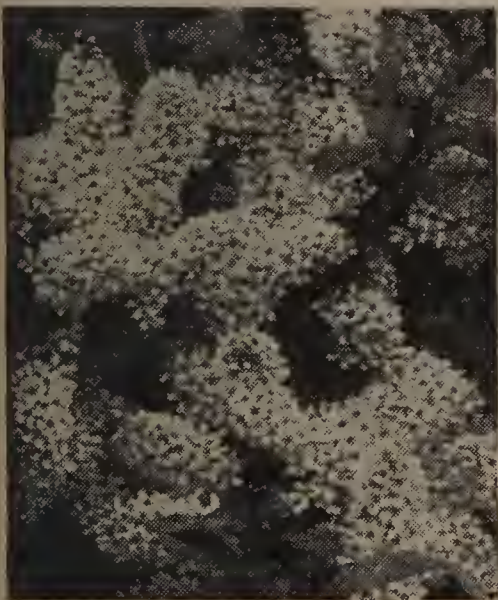

(Redbud). Beautiful bright pink blossoms in early spring before leaves appear. Medium size tree with large, irregular head and heart-shaped leaves. Strong, 2-yr., 18-24 in. trees, 30c each; 3 for 75c.

Silver Bell Tree

(Halesia tetraptera). Sometimes called the Snowdrop Tree. Bell-shaped flowers are carried in drooping clusters in early spring. An unforgettable picture when every branch is strung with drooping soft pink buds in the spring, still beautiful later when buds expand into drooping pure white snowdrop-like flowers. Attains a height of 30 feet when fully matured. Fine, 2-yr., 2-3 ft. trees, 55c each; or 3 for \$1.35.

May Day Tree

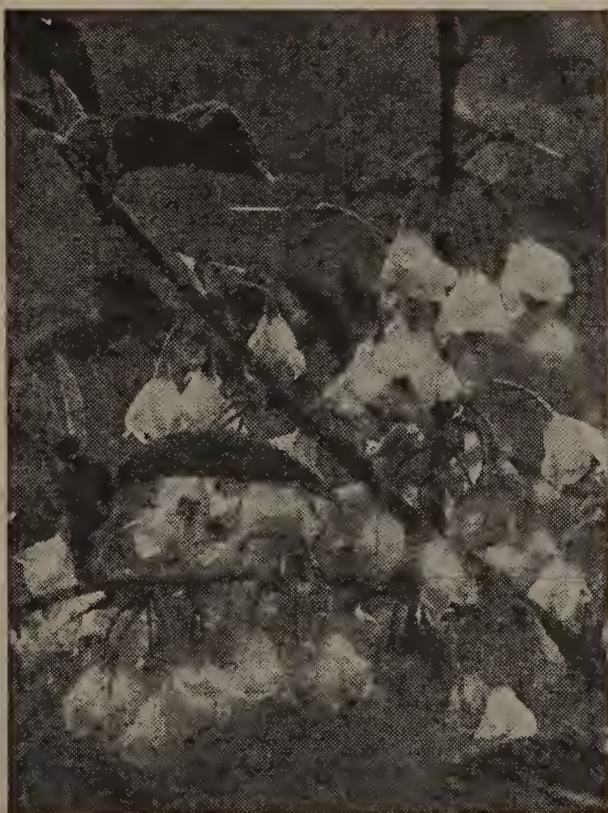

A beautiful lawn tree which comes from Siberia, is one of the first to show green in the spring. The flowers are large, pure white and very fragrant, conical in form; blooms in April or early May. Ideal for cutting. Flowers are followed by fruit, which is small, and although edible and make good jelly, are soon claimed by the birds. May be trimmed up for a shade tree or left in bush form. Very hardy. Fine, 18-24 inch stock, 40c each; 3 for \$1.00; 6 for \$1.75.

\$1.00 net, not prepaid.

American White Birch

(Canoe Birch.) A large, vigorous upright tree with broad, handsome leaves and brilliant white bark. Fine, 3-4 ft. trees, 25c each; 3 for 65c; or 10 for \$1.90.

European Mountain Ash

Lombardy Poplar

Silver Maple (*Acer dasycarpum*.) Very hardy, rapid growing native tree, valuable for producing quick shade. Good sized, rather deeply and irregularly indented leaves, which turn yellow and bronze in the fall. Trees well rooted, well branched, straight trunks; all fine, sturdy specimens. Prices: 2-yr. 5-6 ft., 40c each; 3 for \$1.00; 10 for \$3.00. 2-yr., 6-8 ft., 60c each; 3 for \$1.65; 10 for \$4.85. 3-yr., 8-10 ft., 90c each; 3 for \$2.55; 10 for \$7.85.

Poplar, Lombardy A tall tapering tree, rapid grower, attaining a height of 60 feet in a short time. Leaves dark green, with silvery surface below. Price: 2-yr., 4-5 ft. trees, 35c each; 3 for 75c; 10 for \$2.50. 2-yr., 6-8 ft. trees, 45c each; 3 for \$1.25; 10 for \$3.00. 3-yr., 8-10 ft. trees, 75c each; 3 for \$2.00; 10 for \$5.00.

Magnolia Tripetala Attains a height of 30 to 40 feet; has immense leaves, usually 12 to 24 inches long, and from 7 to 10 inches wide. Leaves grow in clusters about the large white flowers and rose-colored fruit cones. Fine, 1-2 ft. trees, 85c each; 2 for \$1.40.

Cut-Leaf Weeping Birch

A tall, slender tree of vigorous growth, with graceful drooping branches, silvery white bark and delicately cut foliage. Strong, 2-yr., 4-5 ft. trees, \$1.75 each; or 2 for \$3.00.

Wisconsin Weeping Willow A graceful tree of large size. Its fresh, bright green tint, and long, wavy branches make it very attractive. This is the most generally planted variety, and makes immense broad-topped specimens. Long, fine leaves on slender branches. Grows rapidly. Strong, 4-5 ft. trees, 35c each; 3 for \$1.00; or 10 for \$3.00.

European Mountain Ash (*Sorbus aucuparia*.) A hardy, medium size, smooth barked tree; head dense and regular. Covered from July until winter with large clusters of bright red berries. Reaches a height of 25 to 30 feet when matured. A most beautiful and attractive tree. Strong, 2-yr., 3-4 ft. trees, 50c each; 2 for 80c. 5-6 ft. trees, \$1.50 each; or 3 for \$3.95.

Whitney Point, N. Y.

Gentlemen: Trees arrived in good condition. Am surprised at quality; your prices were quite a bit less than where we have bought elsewhere, especially the Mt. Ash. We paid \$1.00 less than same age and size of some others and I honestly expected to find I should have ordered where they cost more, but it is more healthy and rigid stock than I have had at higher prices from other firms.

MRS. H. W. PECK.

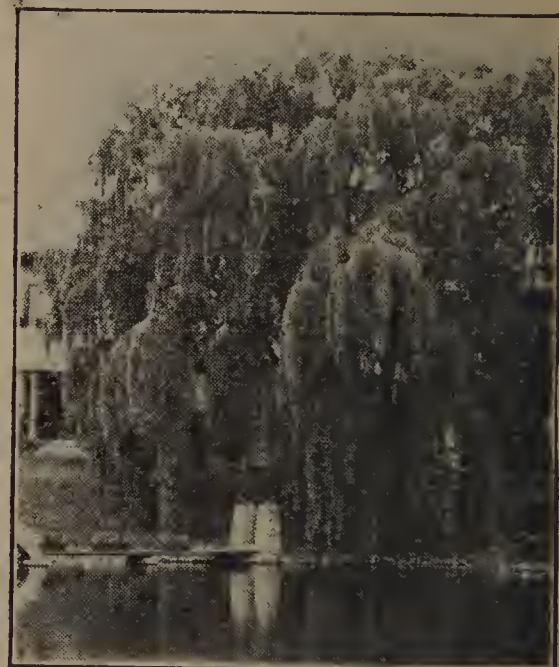

Chinese Elm

Magnolia Tripetala

Cut-Leaved Weeping Birch

Wisconsin Weeping Willow

Chinese Elm (*Ulmus pumila*.) Very rapid grower. Will give ample shade in only 5 or 6 years from planting. Has dense, dark green foliage; is the first shade tree to leaf out in the spring, and the last to shed its leaves in the fall. Resists drought and cold, and succeeds in all parts of the United States. Does well in all soils, except on low, wet grounds. Prices: 2-yr., 4-5 ft. trees, 40c each; 3 for \$1.00; 10 for \$2.75. 2-yr., 6-8 ft. trees, 75c each; 3 for \$1.95; 10 for \$6.00. 3-yr., 8-10 ft., trees, \$1.40 each; 3 for \$3.50; 10 for \$11.00.

NUT TREES

English Walnut Tree

Japanese Walnut

Handsome ornamental shade tree; grows very rapidly; has large, lustrous leaves and bears heavy crops of nuts resembling butternuts, but the kernels come out more readily and more whole. Very hardy. Attains a height of 50 feet at maturity. **Fine, 2-3 ft. trees, \$1.00 each; 3 for \$2.75; or \$9.00 for 10.**

Butternut Native tree, producing long large nut. Has a sweet, oily, nutritious kernel. **2-yr., 2-3 ft. trees, 20c each; 3 for 50c; 6 for 85c; or 10 for \$1.30.**

Japanese Chestnut Distinct from other chestnuts; dwarf grower, productive usually when two or three years old. Nuts of immense size, larger than American Chestnut and equally sweet and good. **Fine, 2-3 ft. trees, \$1.00 each; 3 for \$2.75; or \$9.00 for 10.**

American Filbert (Hazel Nut). The family favorite, having attractive bush, yielding abundant crops of tasty round nuts, which are tender and of fine flavor. Bears young. Does not grow large tree. **Fine 2-3 ft. trees, 50c each; 3 for \$1.25; or 10 for \$4.00.**

Black Walnut The common Black Walnut is very productive in nuts which are liked by many. **Fine, 2-3 ft. trees, 20c each; 3 for 50c; 6 for 85c; or 10 for \$1.30.**

English Walnut Tree valuable for its fruit and shade. The nuts are thin shelled with full-meated kernels of delicious flavor. Tree is hardy and productive. **Fine, 2-3 ft. trees, \$1.25 each; 3 for \$3.50; 10 for \$10.00.**

Hardy Pecans Of all the varieties of this luscious and valuable nut family, the Pecan stands at the head of the list. Hardy and strong grower; nuts of good size and well filled. Shell very thin and easily opened. **Fine, 2-yr., 2-3 ft. trees, \$1.00 each; 3 for \$2.75.**

Soilmaster

and in your garden. Holds seven times its weight in moisture, and is a good fertilizer. Rejuvenates gardens, lawns, shrubbery and trees; is a natural plant food, a natural soil builder; far superior to stable manure, has the same fertilizing value, is clean, odorless and does not burn; and can be applied any time and anywhere.

Is ideal for the farm home, garden or suburban home. Requires less water after application than other fertilizer as it holds moisture for an indefinite period. Makes the soil mellow and prevents baking. Soilmaster goes farther, lasts longer and is more economical; two-bushel bag, which is approximately 100 pounds, is enough for 100 square feet of lawn or 8 good sized shrubs or ornamentals. You are assured of a three year's growth in two year's time by using this humus. **Note testimonial.**

Soilmaster is a decomposed, concentrated leaf-mold and decayed vegetation. This is the humus to use on lawns, around shrubs

Sodus Acid Humus

Rhododendrons and Blueberries, or any shrub or ornamental that requires an acid soil.

2-Bushel Bag for \$1.00, net — not subject to any cash discount.

10-Pound Bag for 25c, net — not subject to any cash discount.

We will ship the 2-Bushel Bags by freight collect unless otherwise instructed.

Gentlemen:

Kent, Ohio.

As a result of our many years spent in the care of thousands of fine trees, we know that lawn trees must be supplied with artificial food—more especially with humus.

After vigorous tests and use extending over a period of 4 years, we are glad to say that Soilmaster has proven itself to be an ideal form of humus. Results following its use have been uniformly satisfactory and at times quite amazing.

We therefore take pleasure in recommending the use of Soilmaster. Inasmuch as it is taken from the natural soil deposit, there seems to be no danger of overfeeding or burning in its generous use.

Sincerely yours,

The Davey Tree Expert Company,

Signed, M. L. Davey, President.

Sodus Humus will hold moisture and has the same fertilizer value as Soilmaster—the only difference between the two is that one is sour and the other is sweet. We recommend this Humus for Evergreens,

Evergreens

Big Size and Baby Size

Our Big Size Evergreens are large enough for immediate effect. Their roots are carefully balled in damp moss or peat, to cut down on weight, and then wrapped in burlap. This insures safe transplanting. Each will weigh from 10 to 15 pounds, and can be shipped by parcel post or express.

Mugho Pine

Mugho Pine Genuine true dwarf type. Growth is dense and plants are thickly covered with heavy, dark green needles. Never grows over 4 to 5 feet tall, but spreads out 6 or more feet in diameter when full grown. Balled in moss and burlapped, 15- x 18-inch trees, XXX, \$3.00 each. No Baby size in this variety.

Irish Juniper Erect and slender, formal and columnar in form. Very compact, deep green foliage. When matured, this tree reaches a height of 6 to 7 feet, but it is never over 1½ feet in diameter. Popular for cemetery plantings as well as for landscaping home grounds. Balled in moss and burlapped, 15-18 inch trees, XX, \$1.40 each; 3 for \$3.75. Baby size, 10 to 12 in., 35c each; 2 for 60c.

Colorado Blue Spruce Most popular and showy of all Spruces. Glistening silver foliage. Very hardy, good grower, withstands severe winters and excessive moisture, and is very easily transplanted. When dormant the tree acquires a somewhat greenish cast, but as soon as the new growth makes its appearance, clothing it in a deeper cast of blue, the full beauty of this glorious tree can be appreciated to the utmost. Balled in moss and burlapped, 18 to 24 in., XXX selected specimens, only \$2.90 each; 3 for \$7.50. No baby size in this variety.

Norway Spruce Fine for windbreaks and hedges; equally good for groups or specimens. Tall, rapid grower. Most popular for Christmas trees. Selected specimens, 5 to 7 ft. tall, balled in moss, only \$3.00 each; 2 for \$5.00. Baby size, 10 to 12 in., 30c each; 2 for 50c.

Pyramidal Arbor-Vitae Densely columnar type, compact and erect. Foliage is deep green. Height matured, 12 to 15 feet. Most popular pyramidal tree on the market. Balled in moss and burlapped, 24- to 30-in. trees, XX, \$1.80 each; 3 for \$4.60. Baby size, 8 to 10 in. diameter, 40c each; 2 for 70c.

Woodward Arbor-Vitae This splendid globe Arbor-Vitae is rapidly becoming one of the most popular varieties. This is due to the fact that it maintains itself well under all conditions, and keeps the globe habit without trimming. Seldom attains a height of more than 3 feet. Foliage is dense, and of deep sea green shade. Balled in moss and burlapped, 12x15 in. specimens, XXX, \$1.25 each; 3 for \$3.00. Baby size, 6 in. diameter, 40c each; 2 for 70c.

Pfitzer's Juniper Extremely popular. Thrives anywhere. One of the few Evergreens that will withstand considerable shade. Color is deep green, with a grayish cast. Should be in every Evergreen planting. Balled in moss and burlapped, 18 to 24 in., XXX, only \$2.25 each; 3 for \$6.00. Baby size, 6 to 10 in., 45c each; 2 for 75c.

Concolor Fir Blue tinged, showiest of all Firs. One of the most attractive evergreens in winter. Retains its lower branches, has no insect enemies, and is the best Fir tree to withstand heat and drought. Its large, flat leaves, thickly disposed on the branches, are very noticeable, giving it a dignified appearance. No evergreen planting is complete without Concolor Fir. Balled in moss and burlapped, 18 to 24 in. trees, XXX, only \$2.50 each; 2 for \$4.50. Baby size, 6 to 8 in., 45c each; 2 for 75c.

Concolor Fir

The NEWER Evergreens

Japanese Yew (*Taxus Cuspidata*). Fine shiny waxy foliage, dark green. Will stand various planting conditions, including dense shade. Withstands extremes of heat and cold. Scarlet-red berries in autumn. Its habit of growth is rather upright and spreading; in general this type is wider than tall, branching out from the bottom with several stems and developing into a low bushy formation. Balled in moss and burlapped, 18 to 24 in., XXX, only \$2.75 each; 2 for \$5.00. No baby size in this variety.

Japanese Yew

Biota Bonita

A very compact, slow-growing dwarf type, valuable for foreground and cemetery planting. The flattened leaf-clusters face outward edgewise, presenting a beautiful surface of vertical fluted lines. Color is a fresh green. Balled in moss and burlapped, 12x15 in., XXX, only \$1.55 each; 3 for \$4.00. Baby size, 10x12 in., 45c each; 2 for 75c.

Biota Aurea Nana

Biota Aurea Nana

This variety is identical to the Biota Bonita with the exception that it is fresh yellow-green in color. Balled in moss and burlapped, 12x15 in., XXX, only \$1.55 each; 3 for \$4.00. Baby size, 10-12 in., 45c each; 2 for 75c.

Spiny Greek Juniper

(*Juniperus Excelsa Stricta*). This beautiful variety forms a tall, dense, conical head tapering gradually from the ground to a sharp terminal point; its growth is rather broad from the bottom; color a fine glaucous blue. Baby size, 8-10 in., 45c each; 2 for 75c. 12-15 in., XXX, only \$1.55 each; 3 for \$4.00.

Silver Cedar

(*Junip. Virginiana Glauca*). The glaucous blue color is especially attractive during the spring-growing season, but striking blue at all seasons. Rapid grower. Long, slender branchlets produce a graceful effect. A little pruning induces a compact, formal shape. 15 to 20 feet at maturity. Balled in moss and burlapped, 18-24 in., XXX trees, only \$1.75 each; 2 for \$3.00. No Baby size in this variety.

Moerheim's Blue Spruce

The finest Blue Spruce. Much bluer than either Koster's or Colorado Blue Spruce. Grows straight and shapely. Originated in Holland. Balled in moss and burlapped, 2 to 3 ft., XXXX, selected specimens, only \$4.50 each; 2 for \$8.00. No baby size in this variety.

McGredy's
Scarlet

The NEWER ALL HYBRID TEAS

Will bloom continuously this summer and every year following. Everyone loves roses. At our low prices you can plant all you want. Remember, our roses are grade "A," strong, 2-year, field-grown bushes, ready to bloom. It doesn't pay to plant a number two or three grade no matter what the price may be.

Chas. P. Kilham Long, pointed buds, open to double, finely formed blooms of coral-red with orange base. Sweetly scented. Free flowering. Vigorous growers.

Pres. Herbert Hoover Multi-colored. One of the best garden roses. The tall, healthy plants produce large flowers of scarlet, yellow, cerise, pink and flame. A perfect rose for cutting.

Mme. Nicolas Aussel This variety was voted an award of a Gold Medal as "the most beautiful rose in France." Very long, shapely, tapering, bright coppery red buds, that develop into a large, full double flower of an exquisite opalescent salmon-pink. Free and continuous bloomer.

Talisman Its brilliant orange-red buds open to large, fragrant, high-pointed blooms of glowing golden yellow stained with copper-red and orange-rose on inside of petals. As the petals unfold, they become bright apricot-gold, deep rose-pink or old rose, and unlike most roses, the color becomes brighter as the flowers develop. Plants are vigorous, healthy and hardy growers.

Golden Dawn An ideal yellow garden rose. The ovoid, lemon-yellow bud is heavily splashed with crimson before opening and develops into a well formed, sweetly scented, large, double, sunflower-yellow that reminds one of the old favorite Marechal Niel.

Mrs. E. P. Thom

Best yellow rose. Fine, long buds open into perfectly shaped, open flowers of rich lemon-yellow which do not fade; sweetly scented. Very vigorous grower and continuously in bloom.

Mme. Jules Bouche

A splendid white, at times slightly tinted with just a touch of tender blush-pink. Long, pointed, shapely buds and full double, fragrant, well formed flowers. Vigorous grower, and a free bloomer.

E. G. Hill

Beautiful long bud of perfect form and full, double, high-centered flower of dazzling scarlet shading to a deeper red as it develops. Strong, vigorous, free flowering habit.

McGredy's Scarlet

The finely formed bud is dull red and opens slowly into a magnificent, very large bloom of just "red" or deep pink, which lasts a long time. Color varies as to climate; in fact, one fall, after a wet summer, they were really scarlet. Slight Tea scent. A splendid rose for cutting, as the perfectly formed flowers come on long stems.

E. G. Hill

Director Rubio The rose with a "personality," different in form and coloring. The color is cochineal-pink, which is retained almost without fading until petals drop. Fully opened, many-petaled, mammoth blooms are often from 6 to 7 inches across, borne on erect, rigid stems.

Duquesa de Penaranda During the summer the pointed buds are a blend of apricot-orange and dark pink opening to splendid blooms of rich coppery apricot; in the autumn they are luscious cinnamon-peach. The long-lasting blooms of 30 petals each are sweetly perfumed.

Federico Casas This lovely cut flower is coppery pink and orange. It comes from sunny Spain, and is one of the choicest roses we have received from the hands of the rose wizard. This hardy rose will provide you with quantities of blooms every year for years to come.

Mrs. Sam McGredy Coppery scarlet-orange flowers flushed dull red and of fine form. It is double, with 30 to 40 petals, and richly fragrant. Beautiful canes and foliage.

Souer Therese Long-pointed buds are chrome-yellow, heavily marked with carmine; the open flower is rich daffodil-yellow and hold its color well. Sweetbriar fragrance. Blooms come freely on splendid cutting stems. 20 to 25 petals.

Pink Dawn

Grenoble

Group D
Varieties Below
60c each
\$1.65 for 3
\$3.00 for 6

Grenoble Glowing scarlet-crimson. The plant is very vigorous and the blooms come on unusually long stems, making it one of the best garden roses for cutting. Easily one of the best reds.

Mme. Joseph Perraud The long, slender and pointed nasturtium-orange buds open to sweetly fragrant flowers of a charming nasturtium-buff, straying to a lovely shade of shell-pink at the petal edges. Winner of many medals.

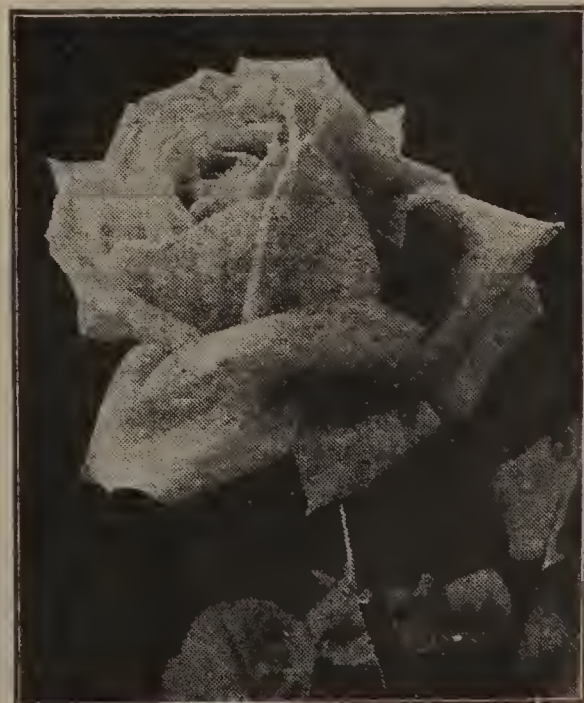

Pink Dawn Deep pink buds open to a large, clear carmine-pink, sweetly scented blooms with high centers and 35 to 40 petals.

Souv. de Mme. C. Chambard

The buds are large, long-pointed, coral in color, and slowly unfold to a coral-pink flower developing a satiny peach tint and sheen. Its fragrance is simply delicious, so that it is not only one of the most beautiful roses but one of the sweetest. Free bloomer. Its long stems and perfect form make it a splendid cut flower. 35 to 40 petals.

Condesa de Sastago

It is the first fully double variety to carry the vivid colors of coppery red and yellow. Very hardy, vigorous, healthy growth. Rich raspberry perfume. Keeps well when cut for indoor enjoyment. Winner of many medals.

Betty Uprichard

FAVORITE ROSES

ALL VARIETIES LISTED ON THIS PAGE:

33c EACH; 3 for 90c.

DAME EDITH HELEN. (Hybrid Tea.) Largest, most perfectly shaped and most perfumed pink rose. Clear, glowing pink, from the time the bud opens until the petals fall. Blooms abundantly, with long, strong stems. Growth of bush is vigorous and thoroughly hardy. Wins praise and admiration everywhere.

ETOILE DE HOLLANDE. (Hybrid Tea.) Large, velvety crimson flowers produced in great profusion throughout the summer. Deliciously perfumed. Vigorous, upright grower. Unquestionably a popular and excellent red rose.

MISS ROWENA THOM. (Hybrid Tea.) Large buds open to full blooms of perfect form, often measuring over 5 inches in diameter. The color is deep rose-pink with a yellow base to the petals which lights up the whole flower. Vigorous grower, splendid foliage, and blooms freely. Delicious fragrance.

MRS. PIERRE S. DU PONT. (Hybrid Tea.) This Gold Medal winner has a medium-sized long-pointed bud of a reddish gold, opening to a semi-double, cupped, very lasting, fragrant flower of a deep golden yellow. The plant is strong and vigorous.

JOANNA HILL. (Hybrid Tea.) Extremely large, very long-pointed; flowers large, semi-double, full, unusually lasting, moderately fragrant, darker yellow than Sunburst, borne singly on long, strong stem. Beautiful foliage; few thorns. Vigorous grower; profuse bloomer.

CALEDONIA. (Hybrid Tea.) Exquisite long buds of ivory-white, changing to purest white as the flowers open into large double blooms of soft velvety texture. The best white. Continuous free bloomer.

BETTY UPRICHARD. (Hybrid Tea.) Deep toned carmine with coppery orange blend; interior mostly delicate salmon-pink. Very choice.

RED RADIANCE. (Hybrid Tea.) Large, globular flowers of an even, clear red. Constantly in bloom. Very popular.

PINK RADIANCE. (Hybrid Tea.) Extra hardy, vigorous and prolific. Blending of carmine-rose with shades of opal and copper.

GRUSS AN TEPLITZ. (Hybrid Tea.) Bright scarlet, shading to velvety crimson; fragrant; free flowering.

PAUL NEYRON. (Hybrid Perpetual.) Largest rose in cultivation. Color bright cerise-red, very fragrant. June until late October. Flowers full and double.

SOUV. de CLAUDIUS PERNET. (Pernetiana.) Most satisfactory yellow rose. Strong, sunflower-yellow, even deeper toned at center. Large flowers; buds long and pointed. Vigorous growing bush, with brilliant foliage.

AMI QUINARD. A variety which is here to stay, beats all others; best near-black Rose in our estimation. Deep velvety crimson, fragrant and very lasting. A vigorous shrubby plant, with almost single flowers of deep blackish scarlet. We know a trial order of Ami Quinard is sure to please.

Paul's Scarlet The flowers, a vivid scarlet, are of good size, semi-double, very freely produced in clusters, on much branched canes. Blooms very long, holding flowers after many June bloomers have dropped their petals. Strong 2-year, field-grown bushes, 30c each, 3 for 75c.

American Beauty This climbing variety has delightful well-formed blooms of rosy carmine. Splendid foliage. Very fragrant. Strong, 2-year field-grown plants, 30c each; 3 for 75c.

Mme. Gregoire Staechelin

(Spanish Beauty). Charming new climber. Long, pointed buds flashing carmine opening into flowers of delicate pink. Long stems for cutting. Foliage very resistant to disease. Strong, 2-year field-grown bushes, only 35c each; 3 for \$1.00.

Cl. Red Radiance Blooms identical with bush form. See page 48. Strong, 2-yr., field-grown bushes, 50c each; 3 for \$1.25.

Cl. Gruss an Teplitz Just as desirable as the bush type. See page 48. Does not run wild, but grows strong and upright. Strong, 2-yr., field-grown bushes, 50c each; 3 for \$1.25.

Cl. Pres. Herbert Hoover

Blooms identical with bush form. See page 46. Strong, 2-year, field-grown bushes, 50c each; 3 for \$1.25.

Talisman No doubt the bush Talisman has attained the greatest popularity of any Hybrid Tea, and now this amazingly beautiful rose comes as a climber. Beautiful two-toned shades of yellow and red. Strong, 2-yr., field-grown bushes, only 50c each; 3 for \$1.25.

Above: Mme. Gregoire Staechelin
Below: Pres. H. Hoover

Everblooming Baby Polyanthas

These are especially fine for solid beds and for borders. Also ideal for cemetery planting because they are so easy to grow and bloom so freely. Are constantly in bloom from early summer until freezing. Very hardy, growing everywhere and requiring very little care.

GLORIA MUNDI. Huge clusters of brilliant orange-scarlet. Grows 18 inches

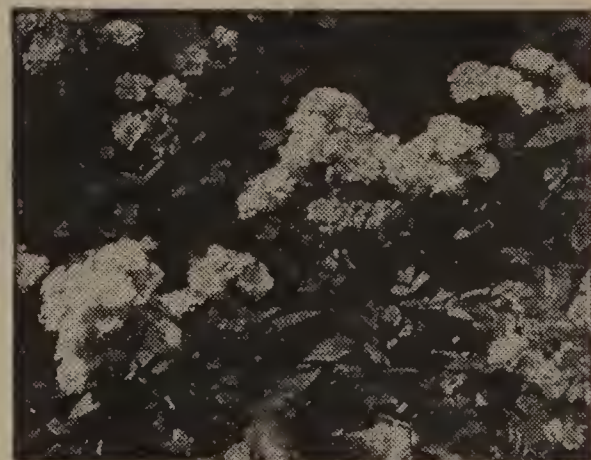

KIRSTEN POULSEN. Large clusters of cherry-red. Grows 3 feet tall.

TRIUMPH D' ORLEANS. One of the finest pinks. Grows 20 inches.

GEO. ELGER. Graceful sprays of beautiful yellow. 18 inches.

CECILE BRUNNER (Sweetheart Rose). Sprays of rosy pink buds open into seashell-pink blooms. 20 inches.

Any of the above five Polyantha Roses: 40c each; 3 for \$1.05; 6 for \$1.80.

Baby Polyanthas

Patented Roses

Guaranteed to live throughout the summer or we will replace all that die at 25c each, provided claim is made by October first, and is accompanied by Plant Patent Label. This is your protection.

BLAZE

U. S. PLANT
PATENT No. 10

This hardy scarlet climber is a cross between Paul's Scarlet and Gruss an Teplitz. Blaze is seldom out of bloom. In the middle of August the bushes are covered with vivid scarlet flowers. Strong, 2-year, field-grown bushes, \$1.00 each; 6 for \$5.00, net.

Blaze

TEXAS CENTENNIAL

U. S. PLANT PATENT No. 162.

Here is a rose that holds its color under a hot sun better than any other variety we know. The bud is long and slender, but opens to a large, moderately fragrant flower, borne on a strong, erect stem. When bloom opens, the color is a bright vermilion-red with a tint of gold at the base of the petals, but as it ages the color gradually changes to a deep rich pink. A continuous blooming hybrid tea rose. Strong, field-grown, 2-yr. bushes, \$1.00 each; 6 for \$5.00, net.

Texas Centennial

WHITTEN-

Perennials

Delphinium

Star of Wartburg Aster

Aster, Star of Wartburg

A beautiful spring-flowering aster, blooming about the same time as peonies. Dark lilac-blue flowers with orange centers rise on 1-foot stems in great numbers. The flowers are usually 2½ to 3 inches in diameter. This is one of the good new asters

of recent introduction. Strong, field-grown plants, 35c each; 3 for 90c; 6 for \$1.65.

Astilbe, Gloria

A short spreading plant with attractive foliage and rosy pink spikes of flowers during June and July, throwing up long plummy wands of blooms. Because of the bulk, feathery character and brilliant color are extremely showy during their season of about 3 weeks. Strong, field-grown plants, 35c each; 3 for \$1.00.

Bleeding Heart

(*Dicentra spectabilis*). Hardy old favorite with heart-shaped rose-colored flowers in drooping spikes. Strong, field-grown plants, with 3 to 5 eyes, 35c each; 3 for \$1.00.

Delphinium

(English Hybrids). Very choice. More delightful color tones and patterns. Among them occur the much prized shades of pink and white, besides the full range of blues; but no particular colors are guaranteed. Strong, field-grown plants, 22c each; 3 for 55c; 6 for \$1.00.

Lupines

(Sweet-scented Hybrids). One of the finest for borders. Handsome foliage, beautiful pea-shaped flowers. Delightful color tones of blue, rose and white; but no particular colors are guaranteed. Strong, field-grown plants, 22c each; 3 for 55c; 6 for \$1.00.

Lupines

Platycodon

Carnation, Crimson King

Armeria

(Glory of Holland). Here's a variety no June flower bed should be without, for its pretty flowers are large, fluffy balls of clear, deep pink, about 2 inches in diameter and are produced on the tip of each stem. Blooms all summer. Very valuable for vases and floral baskets. Field-grown plants, 35c each; 3 for \$1.00.

Crimson King Carnation

Hardy! Ever-blooming! Loads of gorgeous rich red, double blooms, on long stems, from June till frost. Wonderful spicy scent. Perfectly hardy. Blooms first year. Strong plants, 25c each; 3 for 65c.

Platycodon

(Balloon Flower). Large, bell-shaped or broadly cup-shaped deep blue flowers from July to October. Dark green foliage. Very hardy. Growth is upright, 2 to 2½ feet high. Strong plants, 20c each; 3 for 55c.

Armeria, Glory of Holland

Tritoma

(Red Hot Poker). Flaming scarlet flowers, the opened lower petals rimmed with orange. Mulch for winter protection. Strong, field-grown plants, 22c each; 3 for 55c; 6 for \$1.00.

Veronica Subsessilis

Attractive foliage of distinct character, a roughened bronze green. Flowers are borne abundantly during July and August in long compact spikes of a beautiful deep blue. Field-grown plants, 25c each; 3 for 60c; 6 for \$1.10.

Pink Dawn Dianthus

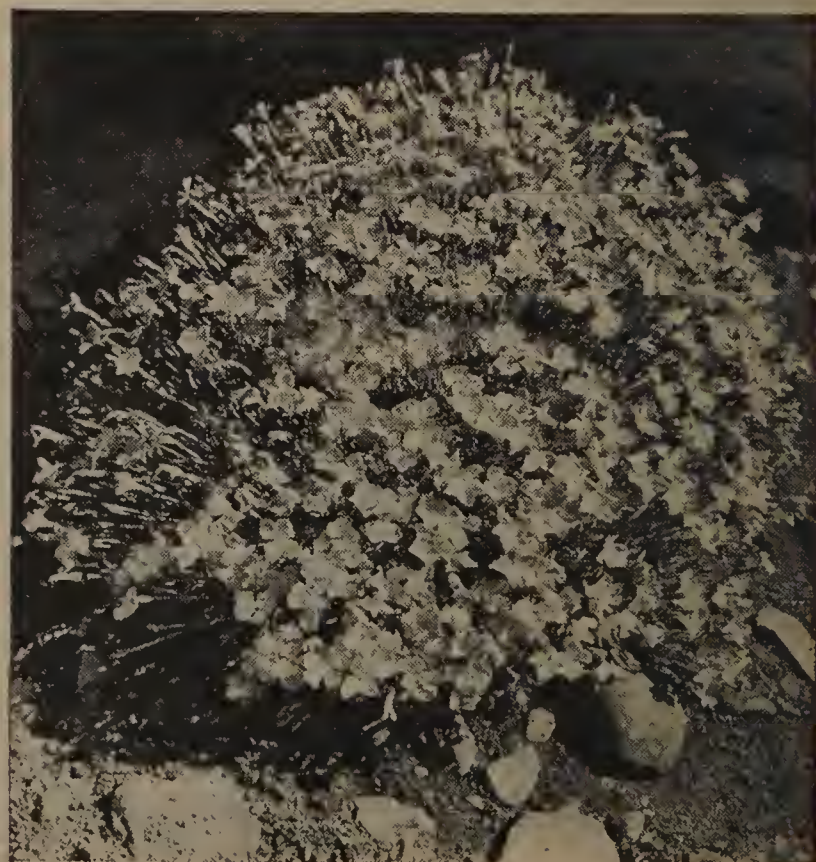

(*Dianthus neglectus compacta glauca*)

New! Something very unique in the line of Dianthus. It first appears all soft and fuzzy like a kitten; then in May hundreds of buds appear on short, straight stems that bristle out like the quills of a porcupine, and then, just before Decoration

Day, blooms appear, completely covering the cushion-shaped plant with dainty 1½-inch rosy pink flowers with crinkled edges. The foliage is blue-green, which remains evergreen all winter. Very hardy. The picture at the left shows this variety in the "fuzzy kitten" stage; and on the right, illustrates same in bloom. Strong plants, 30c each; 3 for 75c.

"Fuzzy Kitten" Stage

Pink Dawn in Bloom

ACKERMAN

Begonias

Camellia-Flowered Tuberous-Rooted BEGONIAS

which resemble a double Camellia. Bloom practically throughout the entire summer. Plants grow 8 to 12 inches tall.

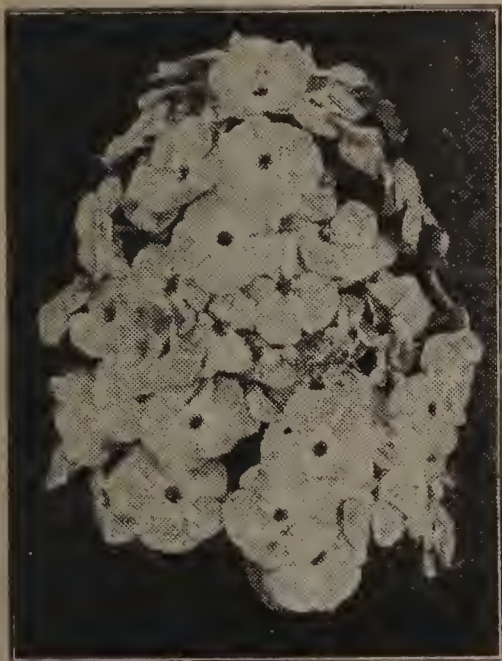

Something entirely different in Begonias—not to be compared with the common kind. Produce large beautiful blooms

When grown outside, take up before cold weather, spread out to dry, pack in boxes of dry sand and store through winter in some cool place. Some little time before planting outside in spring, they should be potted and kept inside until well started.

We offer these in red and pink only—state color wanted. 1-1½ inch tubers, 30c each; 3 for 75c; 6 for \$1.25.

New PHLOX

AFRICA. Color is inconceivably beautiful; can hardly be described. It is an amazing dark carmine-red. Strong vigorous grower, healthy and hardy. One of the best.

Phlox, Lillian

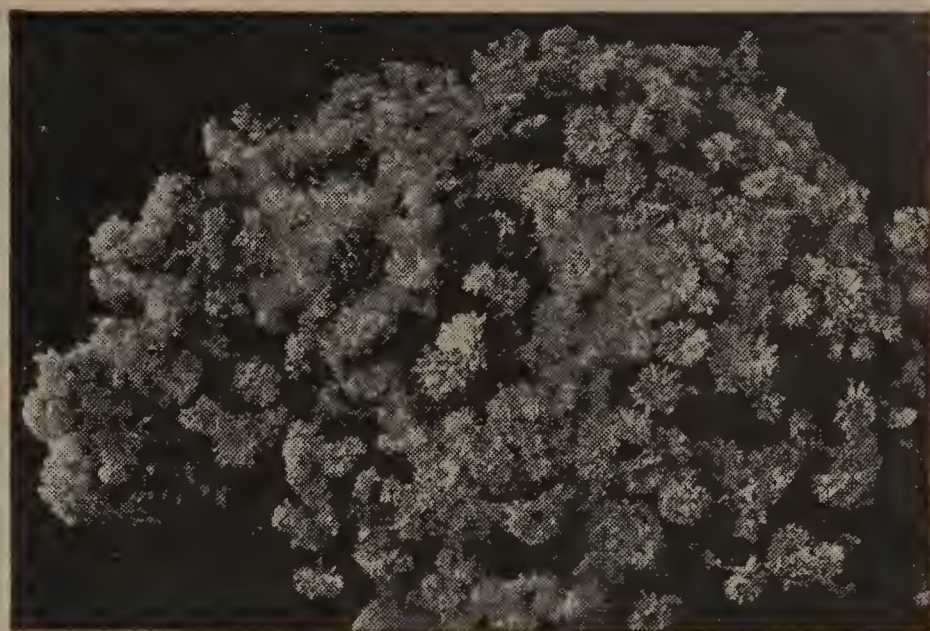

LILLIAN. A new phlox with a charming color combination. Is a rich salmon-pink and has a pretty bluish eye. Very compact flower heads. Healthy, strong grower—often 12 to 15 flower spikes are produced per plant. Fine for cutting; will last 6 to 8 days in water. Very hardy.

NORDLICHT. This variety is colored with one of those pretty and rare shades—indeed there are few colors to compare with it. Is pink with a touch of blue ever so faint, magically blended in, making a wonderful rosy mauve-pink. Healthy and strong grower. Hardy.

SALMON GLOW. Here is a shade of deep rich salmon-pink with a deep carmine eye. Heads well filled, and stately. Foliage is healthy and strong. You should by all means have this beautiful variety.

PRICES:

Above 4 New Phlox, strong plants, 25c each; 3 for 65c.

Pink Cushion Chrysanthemum

CUSHION CHRYSANTHEMUMS

Similar to Azaleamum

These make a rounded, compact bush that from August to Thanksgiving is a mass of exquisite flowers, hundreds of flowers. They will be an attractive addition to your garden for years. Hardy, easy to grow. We offer these in pink, red and yellow—state color wanted. Strong plants.

Pink Cushion—22c each; 3 for 60c; 6 for \$1.00.

Red or Yellow Cushion—30c each; 3 for 75c; 6 for \$1.25.

English Violet

English Violets Now you may have the much loved violet in your own garden. Bloom during May and June with beautiful purple flowers; dark green foliage. Very hardy. Deliciously fragrant. Thrive in sun or shade. Ultimate height, 6 to 8 inches. Strong plants, 25c each; 3 for 60c; or 6 for \$1.00.

PHLOX SUBULATA ROSEA

Creeping Phlox

Makes a beautiful blanket of pink during April and May. Foliage evergreen and mossy. Grows 4 to 6 inches high. The perennial you have been looking for to cover a bank or terrace, as well as an early flowering border plant. Strong plants, 20c each; 3 for 50c; 6 for 90c.

SURPRISE PERENNIAL GARDEN Bargain No. 55

This will indeed be a delightful surprise for you as it will contain a mixture of early spring-flowering, summer and fall-flowering perennials, such as border asters, chrysanthemums, pyrethrum, carnations, spring beauty violets, lavender, false dragonhead, orange wallflower, dianthus, caesius red, pentstemon crimson, coreopsis, alyssum saxatile, Stokesia aster, aquilegia, Canterbury Bells, and others. Our choice of varieties, all 2-yr., field-grown perennials. We do not guarantee any particular varieties. 20 two-year, field-grown assorted perennials for \$1.50, net, not prepaid.

OR

Here's Where Your \$1.00 Goes Farther

50 HARDY PERENNIALS, \$1.00 Postpaid

We Believe in a Square Deal and Practice What We Believe

Our Prices Save You 20% to 40%

Richfield Spgs., N. Y.
April 30, 1938.

Gentlemen:

My recent order was for 30 raspberry transplants and 300 assorted strawberry plants, and as both of these items were shown on your "Bargain List", I expected a "run-of-the-mill" assortment of plants. To begin with, your price was most satisfactory, and when I received the plants, I couldn't, for the life of me, understand how you could supply such fine, sturdy, well-rooted stock. Gentlemen, I have seen mighty fine plants in my travels throughout this country, but I have never seen such outstanding plants in my life—so healthy, so rich, and while they have been in the ground but a week, they already are surpassing some other varieties planted previously and produced elsewhere. Then, too, they arrived in splendid shape, so carefully packed. You can expect more orders from me as my needs dictate.

Sincerely,

J. K. NEUSCHEL.

Chicago, Ill.

Gentlemen:

Received order of nursery stock in excellent condition. The grape vines are splendid, one has 14 bunches, all five will bear this year. These were 3 year stock. All 45 of the raspberry transplants are healthy—ready to bear within the next week.

Yours truly,

H. H. LEPINSKE.

Lima, Ohio
May 23, 1938.

Dear Sirs:

Just a few lines to tell you how pleased I am with the Premier and Dorsett strawberry plants I bought last spring; they sure have a lot of fine berries on, and I like them for they do just what you say—stand the drought well and bear heavily. Made a heavy fruiting row. My neighbors are praising my berries too.

Yours respectfully,

MRS. J. L. ROSS.

Low in Price—but away ahead of others in quality

We have thousands of testimonials such as these, and can furnish, upon request, names of satisfied customers in or near your locality.

Actual photograph of millions of Strawberry plants growing on one of our farms. They will be fresh dug for your order.

Cincinnati, Ohio
April 11, 1938.

Gentlemen:

I received the Moerheim's Blue Spruce in excellent condition, and it far exceeds my expectations. It is indeed a perfect specimen, of excellent color, and its beauty surpasses any tree of its kind.

In gratitude and in recognition of the superb quality nursery stock you shipped to me, will assure you of all my future orders and shall recommend you to all my friends.

Yours Gratefully,

HARRY B. FELDMAN.

Kansas City, Mo.

Gentlemen:

I sent you an order for 150 Amoor River Privet last spring, and wish to tell you they are the finest I ever saw; I set them the 21st of March, and never lost a plant.

C. S. ANGLETON.

Baton Rouge, La.
May 21, 1938.

Gentlemen:

I received your shipment of dahlia collection and spirea V. H., and I wish to express my appreciation for the liberal count, superior selection of plants and care in packing which brought them to me in perfect shape.

Yours very truly,

ALFRED D. ST. AMANT.

Draper, Utah.
April 28, 1938.

Dear Sirs:

Wish to tell you that all of the berry bushes, grape vines, and also the rhubarb and horseradish were received in fine condition, and are doing well. We are telling all of our friends about your stock because we think it is the finest that can be bought and at lowest prices.

Yours truly,

MRS. WM. HUMPHREYS.

THE WHITTEN-ACKERMAN NURSERIES

We guarantee all of our nursery stock to be just as represented in our catalog; fully up to grade, of good quality, free from disease, and absolutely true to name; also to reach the customer alive, and in perfect growing condition.

Furthermore, we will, at our option, either replace free of charge, or refund purchase price, on any stock that arrives in bad condition: PROVIDING CLAIM IS MADE WITHIN FIVE DAYS FROM ARRIVAL OF SHIPMENT, ACCOMPANIED BY A SIGNED STATEMENT FROM THE EXPRESS AGENT OR POSTMASTER AT DESTINATION, SHOWING EXTENT OF LOSS OR DAMAGE.

If any stock proves untrue to name it will, at our option, either be replaced free of charge, or purchase price will be refunded, but in no case will we be responsible for a sum greater than the original purchase price paid. Beyond this our liability ceases. It is understood and agreed between the customer and ourselves that the purchaser's order, and our acknowledgment of its receipt, shall constitute a mutual acceptance of the above terms and conditions.

INSTRUCTIONS FOR ORDERING

LOCATION. Bridgman, Berrien County, Michigan. The World's Largest Fruit Plant Center.
ORDER BLANK. Be sure to use Order Blank and Return Envelope provided. It prevents errors and insures prompt attention. If you do not have an Order Blank, you may order by letter.

ORDER EARLY. By ordering early you will find us with a full line of stock, and your order will be shipped when you want it, with no chance of delay. Early cash buyers receive a Liberal Gift Planting. Be one of them. (See page 2 for details.)

TERMS. 10 per cent discount in January, 5 per cent in February, and no further discount on orders received the balance of the season. This discount applies on orders accompanied by cash in full, except Special Bargain Offers or Special Quotations, which are net. C.O.D. Express or Parcel Post shipment if you prefer. (See Page 3 for full details.)

CLAIMS. All claims covering condition on arrival, shortage or errors, must be made within 5 days after arrival. If stock arrives in bad condition, be sure to furnish signed statement from express agent or postmaster, showing extent of loss or damage. All claims will be taken care of under the terms of our Guarantee printed on page 53. Claims not made in accordance with the terms and conditions of this paragraph cannot be considered.

EXPRESS AND PARCEL POST SHIPMENTS. On express shipments, be sure there is an express office at destination you give. When ordering by Parcel Post be sure to follow our instructions below at right.

If the size or weight of the bundle is too great to comply with Parcel Post requirements, or contains nursery stock difficult to handle by parcel post, we reserve the right to change the routing to express; but in all such cases, any money advanced for the payment of postage will be immediately refunded to customer. Do not ask us to send 5 to 6 ft. or 6 to 7 ft. fruit trees by parcel post, as in order to meet parcel post requirements these trees must be cut back so far that they are very likely to be injured. If you insist on parcel post delivery of these large sizes, we cannot be held responsible for damage to trees.

Express shipments of nursery stock now travel at 2nd class rates, making charges on all packages and bundles about 25% cheaper than formerly.

HOW TO REMIT FOR YOUR ORDER: 1.—By postal money order. This can be purchased at your postoffice, or if you live on a rural delivery route, carrier will attend to sending it for you and bring you the receipt. 2.—By registered mail. In this way you enclose the money itself with the order, taking the Government's receipt, which is your protection. 3.—By express money order. Can be bought at any express office. 4.—By personal or cashier's check. Make it payable to The Whitten-Ackerman Nurseries. Money Orders Preferred.

Do not send cash unless you register your letter. Cash or stamps when sent by ordinary mail are likely to be lost, in which case we are not responsible. We do not pay duty to foreign countries. Please Do Not Send Postage Stamps.

BARGAIN COLLECTIONS—Cannot be Altered, Divided or Changed in Any Manner; Neither Can They be Shipped C. O. D. for Purchase Price, as They are for Cash With Order Only, and are Priced Net, Subject to no discount or Free Plant Offer.

SUBSTITUTION. In ordering be sure to state whether or not we shall substitute some other variety in case the kind ordered is exhausted. If not forbidden, we reserve the right to substitute some similar variety of equal or greater value, but will always label substitutes true to name.

FALL SHIPMENTS. Our stock is fully matured by October 15th, and to southern customers or others wishing to plant in the fall, we can make shipment during October and November.

ACKNOWLEDGMENTS. Orders acknowledged same day received, and shipped in season or as per instructions you give.

NOTE: Should the United States, or any state, increase by taxes, legislative acts, inflation, or in any other way beyond our control, the cost or selling price of nursery stock shown in this catalog, we reserve the right to add to our quoted prices to cover such increases.

Parcel Post Rates

HOW MUCH TO INCLUDE FOR POSTAGE WHEN YOU SEND CASH WITH ORDER

Use for orders over \$3.00, and for shipments into states where we do not advance postage. See note at right.

First locate the group of states in which you live, and it will then be easy for you to determine from schedule below the proper amount to allow for postage on your order.

PARCEL POST ORDERS

If you live east of the Mississippi River, or in Iowa, Missouri, Kansas, Nebraska, or Minnesota, and your order amounts to \$3.00, or less, we will advance postage on your order, you to remit upon receipt of shipment. On orders over \$3.00, and into other states, include postage with order, using schedule at left.

BARGAINS

Any
Six for
\$5.50

You pay exact postage after order is received. Simply count amount of stamps on package, then remit to us. (This applies on shipments into all states east of the Mississippi river, and into Missouri, Iowa, Kansas, Nebraska, and Minnesota. Other states, use schedule on page 54.)

These prices are net, subject to no discount or other free plant offer, and are for cash with order only.

Sweet September Cherry

New Fall-Bearing Cherry

U. S. PLANT PATENT NO. 94

Big sensation in horticulture—novelty of a lifetime. Ripens September first and hangs until the snow flies. Starts bearing the second season after planting and produces heavy annual crops thereafter; will be grown commercially as soon as stock is available. Just imagine going out in your dooryard and picking and eating sweet cherries in the fall of the year!

Fruit is medium to large, red in color; unsurpassed as to quality, delicious for eating raw and a good canner.

Don't let your neighbor get ahead of you—be the first in your community to get started with one or more of these trees.

PRICE:	Each	10	25
1-yr., 3-4 ft. trees	\$1.50	\$14.50	\$35.00

Price is net, not subject to any cash discount.
(See page 8 for further description)

Cultivated Blueberries

Sensation of a Lifetime

Note Actual Photograph to the Left.

As an ornamental shrub the Blueberry cannot be surpassed, are full of pink buds, which open into bell-shaped, white flowers starting in June. Leaves change in color from green to red late in the fall, making a beautiful bush for ornamental planting. Will grow to a height of six to eight feet. Four bushes in your front or back yard will also furnish you with Blueberry pie throughout the season.

It is profitable to plant Blueberries on a large scale. Farmers who have them are getting rich—\$400.00 per acre the third year!

PRICE FOR:	2	4	10	25
1-yr., 4-6 in. plants . . .	\$1.10	\$2.00	\$4.50	\$10.00
2-yr., 6-10 in. plants . .	1.50	2.65	6.00	13.75
3-yr., 10-15 in. plants . .	2.25	4.00	8.75	18.75
4-yr., 15-24 in. plants . .	3.25	5.50	12.50	
5-yr., 2-3 ft. plants . . .	4.25	8.00
